Subject Index

Anti-CD4 monoclonal antibody, receptor, see Glucocorticoid receptor side effects 124
Immunosuppression therapy 128, 129
Atopy, asthma risk factor 64, 65
Basophil
delayed-type hypersensitivity, see Cutaneous basophil hypersensitivity parasite defense 113
Bronchial epithelium, asthma airway wall remodeling 67, 68
cosinophil adhesion 105, 106 excacerbations of asthma 68, 69 inflammatory mediator production 66 structural changes 62–66
Cutaneous basophil hypersensitivity cell recruitment 113, 114 definition 112 initiation in asthma immunoglobulin E role 116–119 nonatopic asthma 119 overview 115, 116 organ surface restriction 114, 115 parasite induction 113
Corticotropin resistance asthma clinical definition 42 cytokine response 10 pathophysiology 76, 77 receptors in T-cells 42, 43, 76, 77
Cutaneous basophil hypersensitivity cell recruitment 113, 114 definition 112 initiation in asthma immunoglobulin E role 116–119 nonatopic asthma 119 overview 115, 116 organ surface restriction 114, 115 parasite induction 113
Corticosteroid-resistant asthma clinical response 43, 127, 128 mechanism of action 127 severe asthma application 9 side effects 128 T-cell mechanisms 43, 44
Cyclosporin A clinical response in asthma 43, 127, 128 mechanism of action 127 severe asthma application 9 side effects 128 T-cell mechanisms 43, 44
Delayed-type hypersensitivity definition 112 Th2 delayed-type hypersensitivity, see Cutaneous basophil hypersensitivity
Dendritic cell, antigen presentation in asthma 63, 64
C/EBPβ, T-helper cell differentiation role 22
CD4 lymphocyte, see T-cell
Chromatin remodeling corticosteroid effects 74, 75, 77, 78 cytokine locus and T-helper cell differentiation 22–25
Confocal microscopy, cytokine imaging 161
Corticosteroid anti-inflammatory actions 75, 76 cytokine inhibition 10, 52, 53, 76 histone acetylation effects 74, 75, 77, 78
C-C chemokines, see Eotaxin, Macrophage inflammatory protein-1α, Monocyte chemoattractant proteins, RANTES
CCR3 eotaxin receptor 168, 169 therapeutic targeting 172
CD4 lymphocyte, see T-cell
C/EBPβ, T-helper cell differentiation role 22
Chromatin remodeling corticosteroid effects 74, 75, 77, 78 cytokine locus and T-helper cell differentiation 22–25
Confocal microscopy, cytokine imaging 161
Corticosteroid anti-inflammatory actions 75, 76 cytokine inhibition 10, 52, 53, 76 histone acetylation effects 74, 75, 77, 78
Corticosteroid receptor, see Glucocorticoid receptor side effects 124 transcription factor interactions 74
Chromatin remodeling corticosteroid effects 74, 75, 77, 78 T-cell mechanisms 43, 44
Cyclosporin A clinical response in asthma 43, 127, 128 mechanism of action 127 severe asthma application 9 side effects 128 T-cell mechanisms 43, 44
Dendritic cell, antigen presentation in asthma 63, 64
Early asthmatic reaction
  general features 30
  immunoglobulin E blockade effects 31
Eosinophil
  accumulation at allergic inflammation sites
  adhesion molecules 6, 167
  chemotaxis
    chemokines 167–170
    cytokine regulation 170, 171
eotaxin and receptor 167–169
  overview 7, 98, 99, 166, 167
  cytokine production 7
  adhesion receptors in function
    activation 102, 103
    egress from bone marrow 99
    endothelial adhesion 99
    epithelial adhesion 105, 106
    firm arrest 103, 104
    matrix protein adhesion 104, 105
    tethering 100–102
  blood level regulation 171, 172
  bronchial epithelium damage in asthma 63
  cytokine production 84, 189
  exocytosis
    GTP-binding protein requirements
    192, 193
    overview 190
    SNARE proteins 195
    superoxide generation 193–195
    ultrastructural aspects of degranulation 190–192
  fibroblast interactions 85–88
  interleukin-5 in development 51
  mast cell interactions 82–84
  parasite defense 113, 166
  prolonged activation 81
  RANTES mobilization and release
  189, 190
Eotaxin
  allergic airway inflammation role 169
  asthma role 185, 186
  cytokine regulation of expression
    170, 171
    eosinophil
      chemotaxis 167, 168
      regulation 171, 172
  receptor 168, 169
  triggers for expression in asthma 184, 185
Exocytosis
  GTP-binding protein requirements in eosinophils 192, 193
  overview 190
  SNARE proteins 195
  ultrastructural aspects of degranulation 190–192
Extrinsic asthma
  C-C chemokine expression
    bronchial mucosa 180–182
    bronchoalveolar lavage 182, 183
    sputum 183
    cytokine response 45, 46
    definition 45
Fibroblast
  eosinophil interactions 85–88
  mast cell interactions 85–88
Fibrosis
  asthma 149
  immunological component in pathophysiology 148, 149
  inflammatory mediator
    contributions 153, 154
  sarcoidosis 149, 151, 152
  schistosomiasis 149
  T-helper cell subsets 154–156
    BCG immunization studies 152
    overview 149, 150
    PPD inoculation studies 152
  T-cell role 150, 151
  FK506, see Tacrolimus
  Flow cytometry, intracellular cytokine staining 140–143
  GATA3, T-cell development role
    18, 20, 21, 24, 25, 55
Glucocorticoid receptor
  binding elements 73
  corticosteroid-resistant asthma 42, 43, 76, 77
  nuclear receptor superfamily 72, 73
  osteocalcin repression 73
  protein interactions 73
Glucocorticoid receptor (continued)
transactivation vs transrepression in therapy 77, 78
Glucocorticoid-resistant asthma,
see Corticosteroid-resistant asthma
Gold
asthma treatment efficacy 126
mechanism of action 126
side effects 126, 127
Granulocyte-macrophage colony-stimulating factor, inflammatory response in lung 66
Hayfever
immunotherapy
administration routes 204
efficacy 199–201, 205
indications 199, 205
mechanism 204, 205
safety 199, 202, 203
management 199
Heparin, fibroblast effects 86, 87
Histamine, allergy role 82, 83, 85, 86
Ikaro, T-cell development role 17, 18
Immunocytochemistry, cytokines 159–161
Immunoglobulin E
cytokines in synthesis 51
nonatopic asthma 52
Th2 delayed-type hypersensitivity role 116–119
Immunotherapy
efficacy in allergic diseases 199
hayfever
administration routes 204
efficacy 199–201, 205
indications 199, 205
immune deviation after allergen injection 5
mechanism 204, 205
safety 199, 202, 203
In situ hybridization, cytokine expression analysis
applications 162, 163
multiple staining 161
overview 159, 162
probes 162
quantification and interpretation 163
Integrins, overview 95, 96
Intercellular adhesion molecule-1
cosinophil function 104, 105
expression in allergic disease
endothelial receptors 96, 97
soluble receptors 98
induction 95
ligands 95
Interferon-γ, expression in asthma 3
Interleukin-4
chromatin remodeling and T-helper cell differentiation 23, 24, 26
corticosteroid inhibition 52, 53
expression in asthma 3, 10, 45, 46
knockout mouse 53, 54
T-helper cell differentiation role 19, 20
Interleukin-5
chromatin remodeling and T-helper cell differentiation 23–25
corticosteroid inhibition 52, 53, 76
eosinophil development role 51
regulation 171, 172
eotaxin synergism 54
expression in asthma 2, 3, 10, 11, 45
knockout mouse 53, 54
Interleukin-8, asthma role 179
Interleukin-13
chromatin remodeling and T-helper cell differentiation 23, 24, 26
intrinsic vs extrinsic asthma expression 45
T-helper cell differentiation role 19, 20
Interleukin-16, asthma role 179
Intrinsic asthma, see Nonatopic asthma
JunB
chemokine expression role 183, 184
T-helper cell differentiation role 22
Late asthmatic reaction
allergen peptide-induced reactions
immunoglobulin E independence 32, 36
major histocompatibility complex restriction 33–36
model for study 32, 33
general features 30, 31
