Subject Index

A δ fibers, skin sensation mediation 84, 85
Atopic dermatitis
  irritance testing 115, 116
  pH of skin 114, 115
  scoring 113, 117
  transepidermal water loss 114–117
  ultrasound monitoring 116

Biopsy, skin 1, 218
Blister, optical coherence tomography 32, 34
Blood flow
  calibration of instrumentation 211
  capillaroscopy and fluorescence video microscopy 120–122
  error sources in measurement 210
  local cold exposure tests 126–128, 130
  photoplethysmography 123, 124
  psoriasis 110
  safety testing 242
  vibration white finger syndrome 124, 126
Blood pressure, capillary measurement 130, 132

C fiber, skin sensation mediation 84, 85, 88
Capillaroscopy 120–122
Capillary pressure, measurement 130, 132
Climate
  influence on cosmetic skin parameters 151, 152, 158–163, 211, 212
  seasonal variability 227, 228

Cold exposure test, see Local cold exposure test
Cole impedance equation, electrical
  assessment of stratum corneum hydration 38, 40, 45, 168, 169
Colorimetry
  error sources 210
  psoriasis 110
  safety testing 242
Corneometer
  assessment of hydration 155, 156, 178, 224
  instrumentation 225, 226
  sensitivity 227
Cosmetics
  documentation method improvements 204
  ethics in human testing 237–239
  intermediate products 205
  legal definitions 204–207, 235
  legal status of academic research groups 207
  product claim 203, 204
  regulation 205, 236, 237
  testing
    contract testing 241
    in vitro 239, 240
    in vivo 237
    trends 240, 241
Cutaneous microdialysis
  applications 90, 96, 97, 217
Cutaneous microdialysis (continued)

principle 90–92
probe
depth 92, 94
design 93
insertion 93
recovery 91, 92
skin penetration studies in vivo
enhancement of compound penetration 95
measurable compounds 96
unmeasurable compounds 94, 95
trauma after probe insertion 93, 94

Dermatitis, see Atopic dermatitis

Diaper
disposable design 183, 185, 192–194
fluid distribution measurement 189, 190
skin hydration measurement
adult forearm model 184, 186, 187
child test model 187, 188
electrical conductance measurements
189–191
infant usage trials 185
transepidermal water loss 184, 188–190, 193

Diurnal variation, skin parameters 212

Eczema, optical coherence tomography 33, 35
Elasticity, see Mechanical properties, skin
Electron microscopy, skin samples 2, 3
Epidermis, see also Stratum corneum
functions 165
hydration, see also Transepidermal
water loss
kinetics 177
moisturizer evaluation 177–180
ultrasound 181
lipids 165

Fenton reaction, free radical formation 99
Fluorescence video microscopy, blood flow
measurement 120–122
Free radicals
detection 99, 100
formation by Fenton reaction 99

Good clinical practice
guidelines 206, 207
legal status of academic research groups
207

Hair cuticle, laser confocal microscopy
image acquisition and analysis 196, 197
photoprotection evaluation 199–202
sample mounting 197
staining 197
High-performance liquid chromatography,
skin drug concentration determination
218, 221
Human testing, ethics 237–239
Humidity
effect on stratum corneum hydration 211, 228
influence on cosmetic skin parameters
151, 152
Hydration index, electrical assessment of
stratum corneum hydration 41, 42
Hypothesis testing 214

Imaging, see also specific methods
history of development 209, 210
indirect methods 3–5
invasive methods 1–3
non-invasive methods 5–8, 108, 109
Irritancy testing
atopic dermatitis 115, 116
occupational dermatology 145, 148
reproducibility 148

Laser confocal microscopy
hair cuticle
image acquisition and analysis 196, 197
photoprotection evaluation 199–202
sample mounting 197
staining 197
skin samples
in vitro 2, 5
in vivo 8
Laser profilometry, see Profilometry
Light microscopy, staining and resolution of
skin samples 2
Lipid
proton magnetic resonance imaging 16–18
stratum corneum composition 165
electrical impedance measurement 167–169, 171–174
measurement techniques 166
structure and physical properties 166, 167
Local cold exposure test
circulation evaluation 126, 127
Raynaud’s phenomenon evaluation 127
senvonulling technique 130
Localized scleroderma
skin elasticity 111
skin thickness 112
ultrasound monitoring 112
Magnetic resonance imaging, skin
instrumentation 13
lipid protons 16–18
performance and applications 7, 8
phosphorus-31 spectroscopy 12, 13
resolution 12
water signal suppression 18
Mechanical properties, skin
aging effects 81
anatomical site variations 80
Cutometer suction device
general description 71
strain vs time mode 71–73
stress vs strain mode 73, 74
effects on results in suction experiments
aperture 77
pressure 76, 77
pretension of skin 77–80
gender differences 80
instrumentation overview 134, 135
interindividual coefficients of variation 82
moisturizers and emollients, influence of
topical applications 81, 82
perturbation methods 69
scleroderma
skin elasticity in local scleroderma 111
Sklerimeter assessment of distensibility
apparatus 135, 136
controls 138
reliability of observers 138, 140–142
sites of measurement 136, 137, 142
skin thickness effects 142, 143
statistical analysis 137, 138, 142
strain vs time response 69
stripping effects 82
Microdialysis, see Cutaneous microdialysis
Microscopy, see Electron microscopy,
Fluorescence video microscopy, Laser
confocal microscopy, Light microscopy,
Video microscopy
Nonsteroidal anti-inflammatory drugs,
correlation of in vitro and in vivo
testing 217–222
Optical coherence tomography, skin imaging
blisters 32, 34
diagnostic value 36
eczema 33, 35
histological correlations 29, 31, 33, 34
instrumentation 28
overview 8
resolution 27
scabies 33, 35
tumors 32–34, 36
Optical profilometry, see Profilometry
Optothermal transient emission radiometry,
water distribution in stratum corneum
apparatus 48, 49
occlusive hydration experiments 56, 57
tape stripping measurements 53–56
theory 50–53
Peroxidation
assay in stratum corneum
antioxidant product testing 100, 101,
104, 106
fluorogenic probe 100
in vivo study 100
influence of exploration depth 102
phototype influence 103, 104
ultraviolet A irradiation effects 102,
105, 106
free radical formation by Fenton reaction 99
ultraviolet radiation induction 99

Subject Index 247
Subject Index

Pharmaceuticals
- ethics in human testing 237–239
- legal definition 235, 236
- product claim 203, 204

Photoplethysmography
- arterial measurements 124
- light source 124
- principle 123, 124
- vibration white finger syndrome 126

Postherpetic neuralgia, thermal sensory testing 87

Product claim
- cosmetics vs medicinal products 203, 204
- documentation method improvements 204

Profilometry
- DIN parameters 154, 155, 159
- laser profilometry, data collection 153
- principles 4, 5
- seasonal effects 158–160

Psoriasis
- monitoring
  - blood flow 110
  - colorimetry 110
  - skin thickness 110, 111
  - transepidermal water loss 109, 110
  - ultrasound 111
- treatment 109

Raman spectroscopy, skin
- Fourier transform spectral components of stratum corneum 23–25
- information available from spectra 22, 26
- instrumentation 22, 23
- in vivo spectra 25
- scattering principle 20, 21
- visible light Raman spectra 25

Raynaud’s phenomenon, local cold exposure testing 127

Replica, skin imaging 3, 4

Scabies, optical coherence tomography 33, 35

Scalp sebum, see Sebum, scalp

Scleroderma, see Localized scleroderma

Sclerosis, see Systemic sclerosis

Sebum, scalp
- expression of amounts 67
- hair measurement 61, 62, 65, 66
- probe evaluation
  - operation 62, 67
  - regreasing study 64–67
  - repeatability and reproducibility 63, 64
  - Sebometer SM 810 comparisons 63, 65, 68
- substrates for sample collection 61

Skin thickness
- localized scleroderma 112
- psoriasis 110, 111
- systemic sclerosis 113

Statistical analysis, skin studies 213, 214

Stratum corneum
- functions 223
- hydration, electrical assessment
  - aging effects 230
  - anatomical site variation 229
  - capacitance 225
  - climate effects 228
  - Cole impedance equation 38, 40, 45, 168, 169
  - commercial instruments 227
  - corneometer instrumentation 225, 226
  - diaper analysis 189–191
  - guidelines 232, 233
  - hydration index 41, 42
  - impedance 224, 225
  - modeling of stratum corneum 45, 46
  - moisturizer evaluation 230–232
  - multi-frequency approach 38, 39
  - Oslo limit conditions 43, 44
  - probe application 228, 229
  - seasonal variability 227, 228
  - single-frequency measurement 39, 40, 42–45
  - technique overview 224
  - variability 38, 40

lipids
- composition 165
- electrical impedance measurement 167–169, 171–174
