Subject Index

β-Adrenergic receptor
  aging changes
    downregulation 46, 47
    responsiveness 25, 26
    signaling 48
    classification 46
Alzheimer's disease, autonomic dysfunction 29
Andropause, characteristics 97, 98
Baroreflex sensitivity
  aging changes 26–28, 49
  baroreceptor neurons 47
Birth defects, paternal age effects 96, 97
Bladder
  acute bladder obstruction model of plasticity 89, 90
  aging effects
    incontinence 2, 79–81
    innervation 85, 86
    menopause-associated changes 89
    morphology and function in animals 87, 88
    ultrastructural features in normal aging 86, 87
  continence factors, elderly 78, 79
  functions 78
  muscle strip and in vivo contractility studies in rats 88, 89
  neural control
    innervation 81, 83, 84
    neurotransmitters and receptors 84, 85
Blood pressure, see also Orthostatic hypotension
  age-related dysfunction 2, 49
  measurement 50
  normal changes in aging 33, 34
Body composition, age-related changes and autonomic nervous system dysfunction 48, 49
Bowel motility, age-related dysfunction 1

Calcium dynamics, neuroaxonal dystrophy role 15, 16
Carbohydrate metabolism
  autonomic nervous system dysfunction in disorders 57
  autonomic response to carbohydrate intake 58
  glucose
    intolerance in aging 53, 54
    non-insulin-mediated uptake 61, 62
    production in aging 58, 59
  hypoglycemia, aging effects on adrenergic response 62, 63
  insulin changes in aging
    glucose uptake response 61
    secretion 59, 60
  mechanisms of age-related changes 54–56
  stress-induced hyperglycemia in aging 57, 58
Cardiovascular reflexes
  age-related dysfunction 2, 5, 47, 48
Cardiovascular reflexes (continued)
see also specific reflexes
Colon, aging effects 73, 74
Diabetes, see Carbohydrate metabolism
Diastolic function, normal changes in aging 36
Dopamine, synthesis 45, 46
Epinephrine
receptors 46, 47
synthesis 45, 46
Esophagus, aging effects 67-69
Extracellular matrix (ECM), neuroaxonal dystrophy role 14
Fat metabolism, age-related dysfunction 2
Female sexual function, see Fertility;
Sexual function
Fertility, aging effects
females 94, 95
males 95, 96
Fluid balance, age-related dysfunction 2
Gastric emptying, aging effects 71, 72
Glucose, see Carbohydrate metabolism
Heart failure, neurohormonal dysfunction
diagnosis and management 40-42
Heart rate, normal changes in aging 32, 33
Helicobacter pylori, effects in aging
stomach 69, 70
Hyperglycemia, see Carbohydrate metabolism
Hypertension, pathophysiology in aging 48
Hypoglycemia, see Carbohydrate metabolism
Insulin, changes in aging
glucose uptake response 61
secretion 59, 60
Insulin-like growth factor I (IGF-I),
neuroaxonal dystrophy role 12
Libido, see Sexual function
Male sexual function, see Fertility; Sexual function
Menopause
bladder changes 89
characteristics 98
Nerve growth factor (NGF), imbalance and neuroaxonal dystrophy 11-13
Neuroaxonal dystrophy (NAD)
features and distribution 2, 4
immunostaining studies 4, 7
mechanisms of age-related damage
calcium dynamics 15, 16
extracellular matrix 14
insulin-like growth factor I 12
nerve growth factor imbalance 11-13
oxidative stress 9-11
regenerative mechanisms 13, 14
synaptic degradation of organelles 14
rat studies of aging effects 6, 7
Neurofilaments, superior cervical
ganglion 5
Nitric oxide (NO), activity in sexual function
females 103
males 100
Nociception, see Pain
Norepinephrine
aging effects on levels 5, 48, 57
fates 46
receptors 46, 47
synthesis 45, 46
Orthostatic hypotension, see also
Syncope
mechanisms in aging 49, 50
Oxidative stress, neuroaxonal dystrophy role 9-11
Pain
aging effects on nociception
central nervous system 112, 114
peripheral nervous system 112
autonomic nervous system mediated
pain, age-related changes 114-116
epidemiology in aging 107
perception

Subject Index

136
autonomic nervous system role 111, 112
detection threshold 108
physiological basis 108–111
tolerance 108
Parkinson’s disease, autonomic dysfunction 29
Pharmacodynamics, age-related changes 24

Semen, parameters in elderly men 96
Sexual function, aging effects
  females 102
  males
    central nervous system dysfunction 101, 102
erectile dysfunction 98, 99
libido 99
orgasmic function 99, 100
penile sensations 100, 101
Small intestine, aging effects 72, 73
Stomach, aging effects
  acid secretion 69
  gastric emptying 71, 72
  *Helicobacter pylori* pathology 69, 70
  mucosa 70, 71
Superior cervical ganglion (SCG)
  immunostaining studies in aged rats 8
  neuroaxonal dystrophy 2, 4
  neurofilaments 5
  vacuolar neuritic dystrophy in rats 7, 8
Sympathetic nervous system activity,
  increase in aging 28
Syncope, diagnosis and management 37–40
Systolic function, normal changes in aging 34, 35

Thermoregulation, age-related dysfunction
  cold-induced thermoregulation
    heat conservation mechanisms 124, 125
    morbidity and mortality 123
    perception 123
    rodent studies 125–129
    senescence effects 128, 129
    sex differences 128
    shivering 123, 124
    heat-induced responses 121, 122
    overview 1, 120, 122, 129, 130

Vacuolar neuritic dystrophy (VND), aging
  studies in rats 7, 8
Vision, age-related dysfunction 2
