Bibliographic Indices. This publication is listed in bibliographic services, including Current Contents® and
Index Medicus.

Drug Dosage. The authors and the publisher have exerted every effort to ensure that drug selection and
dosage set forth in this text are in accord with current recommendations and practice at the time of publication.
However, in view of ongoing research, changes in government regulations, and the constant flow of information
relating to drug therapy and drug reactions, the reader is urged to check the package insert for each drug for
any change in indications and dosage and for added warnings and precautions. This is particularly important
when the recommended agent is a new and/or infrequently employed drug.

A large number of sponsors allowed the congress, which was held in the auditorium of Hoffmann-La-Roche in Basel, to become a great success. Katrin Wüthrich and Sara Attianese, our secretaries, brought – because of their never-ending engagement for the research groups, the organization of the congress and even the publication of this book – our work constantly forward. Finally, the collaborators of S. Karger AG, Basel, were very helpful in preparing this volume. We want to thank all of them very much and express them our deepest gratitude.

Dieter Bürgin, Heiner Meng, Basel
