

Thanks to the Reviewers

The Editors and the members of the editorial board would like to thank the following individuals for their expert assistance in acting as reviewers for the *Journal of Vascular Research* in the period of September 2005 to September 2006. Our aim of establishing the journal as a leading journal in the field of vascular science is to a large extent in the hands of our reviewers and we, together with our authors and readers, much appreciate the time which they have freely given.
