Cutting edge techniques presented in print and through instructive online videos

Comprehensive Techniques in CSF Leak Repair and Skull Base Reconstruction

Editor
Benjamin S. Bleier

Written by international leading experts in the field of skull base surgery, this publication provides a comprehensive description of both the etiology and management of defects arising in the anterior skull base. The contributions explore the cutting edge techniques in cranial base repair including free grafting, pedicled endonasal and extranasal grafts as well as free flap reconstruction. Further, this volume provides a detailed description of how to enhance success in cerebrospinal fluid leak and encephalocele repair using an evidence-based approach to the diagnosis and localization.

The contributions are accompanied by high-definition online videos that enable the reader to watch endoscopic skull base repairs performed by the masters while providing a step-by-step explanation of the techniques utilized.

Otolaryngologist, neurosurgeons as well as physicians interested in learning about or wishing to optimize their techniques in anterior skull base reconstruction will find this publication indispensable reading.

Presents complete coverage from basic research to clinical studies

Advances in Oto-Rhino-Laryngology

Series Editor: G. Randolph (Boston, Mass.)

ISSN 0065–3071 / e-ISSN 1662–2847

Material for each volume in this series has been skillfully selected to document the most active areas of otorhinolaryngology and related specialties, such as neuro-otology and oncology. The series reproduces results from basic research and clinical studies pertaining to the pathophysiology, diagnosis, clinical symptoms, course, prognosis and therapy of a variety of ear, nose and throat disorders. The numerous papers correlating basic research findings and clinical applications are of immense value to all specialists engaged in the ongoing efforts to improve management of these disorders. Acting as a voice for its field, the series has also been instrumental in developing subspecialties into established specialties.
