Discussing the latest advances

Controversies in Pediatric and Adolescent Hematology

Editor

Angela E. Thomas, Christina Halsey

Hematological disorders in children and adolescents pose a wide range of management challenges and treatment dilemmas.

In this book an internationally acclaimed panel of authors, each chosen for expertise in their field, have produced a state-of-the-art collection of review articles focusing on the very latest advances and controversies in the management of pediatric and adolescent hematological problems. The whole range of benign and malignant, congenital and acquired, acute and chronic conditions is discussed in detail. Individual chapters cover hematologic problems on the pediatric intensive care unit, treatments for iron deficiency and ITP; advances in stem cell transplantation, gene therapy, novel pharmaceuticals and molecular diagnostics, as well as transition from child to adult are also explored.

Providing an up-to-date look at both specific hematologic disorders in the pediatric and adolescent population and also hematologic problems that arise in association with systemic disease, this book is essential reading not only for pediatric and adult hematologists but also for pediatricians, pediatric or hematologic specialist nurse practitioners and pediatric pharmacologists.

Fields of Interest:

Fields of Interest: Pediatrics; Hematology; Intensive Care, Leukemia, Neonatology, Nursing, Oncology

Contents

Preface: **Thomas, A.E.; Halsey, C.**

Neonatal Thrombocytopenia: **Chakravorty, S.; Roberts, I.**

Pediatric and Adolescent Immune Thrombocytopenia: Prevention of Bleeding versus Burden of Treatment: **Cooper, N.**

Thrombosis in Paediatrics: Genetic versus Environmental Risk Factors and Implications for Management: **Monagle, P.**

Hematological Problems in Pediatric Intensive Care:

Revel-Vilk, S.; Cox, P.; Robitaille, N.; Blanchette, V.

New Advances in the Treatment of Children with Hemophilia: **Lillicrap, D.**

Myelodysplastic and Myeloproliferative Diseases in Children: Current Concepts: **Vyas, P.**

Towards Personalized Medicine in Childhood Acute Lymphoblastic Leukaemia: **Halsey, C.**

Reduced Intensity Conditioning in Paediatric Haematopoietic Cell Transplantation: **Chiesa, R.; Veys, P.**

Can Iron Chelators Replace Stem Cell Transplantation in the Treatment of Thalassaemia Syndromes?: **Darbyshire, P.J.**

Iron Deficiency: When and Why Oral Iron May Not Be Enough: **Crary, S.E.; Buchanan, G.R.**

Principles of Transitional Care in Haematology: **Bolton-Maggs, P.; Choudhuri, S.**

KARGER

The book series

A problem-oriented series for both the general practitioner and the hospital physician

Pediatric and Adolescent Medicine

Series Editor: Kiess, W. (Leipzig)
ISSN 1017-5989 / e-ISSN 1662-3886

This series deals with rapidly evolving pediatric subspecialties such as perinatal medicine, pediatric endocrinology, immunology, neurology and cardiology. The individual volumes not only highlight recent advances in a particular area, but also provide a comprehensive overview of new trends in monitoring child development and subsequent adult health. The series aims to inform both the general practitioner and the hospital physician about current theoretical and practical developments in pediatric and adolescent medicine.
