An attractive selection of key topics on anterior segment surgery

In the ESASO Course Series, the essentials of the courses of the European School for Advanced Studies in Ophthalmology (ESASO) are made available in print. The topics of this volume on cataract surgery range from prevention to state-of-the-art diagnostic techniques and the latest surgical treatment options for many eye conditions such as diabetic retinopathy or rhegmatogenous retinal detachment.

Useful basics, surgical principles, challenging cases, as well as the most advanced femtosecond assisted cataract surgeries are discussed. Different styles of intraocular lenses (IOL) such as phakic IOL in standard and special situations, or ‘iris claw’ IOLs are further presented.

Renowned eye surgeons have contributed their knowledge to make this volume a device to give practical support to specialists as well as trainees in cataract and refractive surgery.

Fields of Interest: Ophthalmology

ESASO Course Series

Series Editors
F. Bandello (Milan)
B. Corcóstegui (Barcelona)

ISSN 1664–882X (Print)
e-ISSN 1664–8838 (Online)

This new book series makes the essentials of the courses of the European School for Advanced Studies in Ophthalmology (ESASO) available to interested ophthalmologists, optometrists, technicians and residents all over the world. The presentations of the courses are published regularly featuring a wide range of ophthalmological topics from vitreoretinal pathology to retinal surgery, retinal diseases, cornea and refractive surgery or cataract.

The European School for Advanced Studies in Ophthalmology (ESASO) was founded in 2008 to address the need of master’s degree programmes as well as the specific further education requirements of training and practicing clinicians, drawing on the skills of ophthalmologists worldwide and the support of various universities.
