A review and update

Orbital Surgery

Editors

Ramón Medel
Luz Maria Vásquez

Orbital surgery deals with a variety of complications occurring in the eye socket comprising inflammatory diseases like thyroid-associated orbitopathy, tumors, infections, and injuries from trauma that affect eye function.

In this volume, renowned European orbital surgery experts share their professional experience and expertise. Their contributions cover basic as well as more specialized up-to-date concepts that are beneficial in the diagnosis and treatment of patients with orbital disorders.

The book offers a practical review of this complex and very interesting branch of ophthalmic plastic surgery for ophthalmology residents, ophthalmic plastic and orbital surgery fellows, ophthalmic plastic surgeons with a special interest in orbital surgery, and general ophthalmologists.

ESASO Course Series

Vol. 5: Orbital Surgery

Editors: Medel, R.; Vásquez, L.M. (Barcelona)

ISSN 1664-882X (Print)

e-ISSN 1664-8838 (Online)

This new book series makes the essentials of the courses of the European School for Advanced Studies in Ophthalmology (ESASO) available to interested ophthalmologists, optometrists, technicians and residents all over the world. The presentations of the courses are published regularly featuring a wide range of ophthalmological topics from vitreoretinal pathology to retinal surgery, retinal diseases, cornea and refractive surgery or cataract.

The European School for Advanced Studies in Ophthalmology (ESASO) was founded in 2008 to address the need of master's degree programmes as well as the specific further education requirements of training and practicing clinicians, drawing on the skills of ophthalmologists worldwide and the support of various universities.
