An evidence-based scientific overview

Early Detection and Intervention in Psychosis

State of the Art and Future Perspectives

Editors

Anita Riecher-Rössler
Patrick D. McGorry

This new volume reviews early detection approaches and possible subsequent interventions for psychosis. After introductory chapters, various methods for early detection not only in adults, but also adolescents are described. In this context, the validity of the psychosis high-risk state is debated along with whether early detection is indeed helpful, or actually stigmatizing, for the patient. Further contributions review neuroimaging, including structural and functional MRI, as well as pattern recognition methods and measurement of connectivity abnormalities. Neurocognitive and neurophysiological assessments are also discussed in detail. The last part focuses on early intervention for emerging psychosis, including psychological methods, non-pharmacological substances and pharmacological treatments. Overall conclusions and future perspectives are provided in a final chapter.

CONTENTS

Foreword:

Carpenter, W.T.

Preface and Introduction:

Riecher-Rössler, A.; McGorry, P.D.

Early Detection of Psychosis – State of the Art and Future Perspectives:

Klosterkötter, J.

Early Intervention in Emerging Psychosis: State of the Art and Future Perspectives:

McGorry, P.D.; Goldstone, S.

First Signs of Emerging Psychosis:

Schultze-Lutter, F.

Psychosis High-Risk States in Adolescents:

Simon, A.E.

The Psychosis High-Risk State:

Rutigliano, G.; Manalo, M.; Fusar-Poli, P.

Early Detection of Psychosis – Helpful or Stigmatizing Experience for Those Concerned?:

Uttinger, M.; Pappmeyer, M.; Riecher-Rössler, A.

Structural and Functional MRI in the Prediction of Psychosis:

Dwyer, D.B.; McGuire, P.

Pattern Recognition Methods in the Prediction of Psychosis:

Koutsouleris, N.; Kambeitz, J.

Connectivity Abnormalities in Emerging Psychosis:

Schmidt, A.; Borgwardt, S.

Neurocognition and Motor Functioning in the Prediction of Psychosis:

Studerus, E.; Pappmeyer, M.; Riecher-Rössler, A.

Electroencephalographic Predictors of Psychosis:

Ruhrmann, S.

Psychological Methods of Early Intervention in Emerging Psychosis:

Müller, H.; Bechdolf, A.

Nonpharmacological Substances for Early Intervention:

Conus, P.

Pharmacological Intervention in First-Episode Psychosis:

O'Donoghue, B.; Walter, M.; Huber, C.G.; Lang, U.E.

Early Detection and Intervention in Psychosis:

Riecher-Rössler, A.; McGorry, P.D.

Fields of Interest: Psychiatry; Psychology; Psychotherapy; Pharmacology; Neurology

KARGER

Problems of clinical psychiatry covered in a series
that has helped pioneer the development of this field

Key Issues in Mental Health

Series Editors:

Riecher-Rössler, A. (Basel); Sartorius, N. (Geneva)

ISSN 1662-4874, e-ISSN 1662-4882

With its first volume published in 1917, this series has served to chart some of the main developments of contemporary psychiatry. Throughout these years, individual volumes have outlined the specific problems and controversies which have characterized the growth of psychiatry and have reflected a broadening acceptance of its methods and applications. Recent volumes have been distinguished by their bench to bedside coverage of current topics in psychiatry, psychology and neurosciences. Taking a rigorously interdisciplinary as well as translational approach, Key Issues in Mental Health attempts to build bridges to related disciplines in an effort to integrate a variety of aspects relevant to the successful diagnosis and treatment of psychiatric disorders.
