SickKids Handbook of Pediatric Thrombosis and Hemostasis

2nd, revised and extended edition

Editors: Victor S. Blanchette, Leonardo R. Brandão, Vicky R. Breakey, Shoshana Revel-Vilk

CONTENTS

Contributors
Preface
Pediatric Thrombosis and Hemostasis: A Historical Perspective: V.R. Breakey, L.R. Brandão, S. Revel-Vilk, V.S. Blanchette
An Approach to the Bleeding Child: S. Revel-Vilk, M.L. Rand, S.J. Israels
Bleeding in the Neonate: L. Avila, V.S. Blanchette
Managing Hemophilia in Children and Adolescents: E. Zapotocka, J.A. Curtin, V.S. Blanchette
von Willebrand Disease in Children: V.R. Breakey, M. Carcao
Rare Congenital Factor Deficiencies in Childhood: F. Xavier, S. Revel-Vilk, V.S. Blanchette
Acquired Bleeding Disorders in Children: R. Kumar, M. Steele
A Diagnostic Approach to a Child with Thrombosis: M. Rizzi, C. Barnes
Venous Thrombosis: V.E. Price, L.R. Brandão, S. Williams
Arterial Thrombosis: S. Revel-Vilk, M. Albisetti, M.P. Massicotte
Thromboembolic Events at Specific Organ Sites: V. Labarque, A.K.C. Chan, S. Williams
Pediatric Stroke: A. Andrade, N. Dlamini, S. Williams, G. deVeber, R. Ichord
Bleeding and Clotting in Children with Cardiac Disease: L.R. Brandão, Y. Diab, B.W. McCrindle
Antithrombotic Therapy in Children: T. Biss, P. Monagle
Genetic Testing and Counseling for Pediatric Inherited Bleeding and Clotting Disorders: R. Babul-Hirji, J. Di Paola, D. Lillicrap
Appendix V: Selected Genetic Conditions That May Be Associated with Disorders of Hemostasis: R. Babul-Hirji, J. Di Paola, D. Lillicrap

Dear Librarian

I have reviewed the SickKids Handbook of Thrombosis and Hemostasis and would like to recommend it for your library.

Recommended by: 
Department: 
Date: 
Signature: 

This handbook takes the reader through the entire field of pediatric thrombosis and hemostasis and is updated to include new information and elements missing from the first edition.

An introductory section concisely explains the complex pathophysiology of hemostasis and thrombosis. The chapters that follow include practical, evidence-based information on the diagnosis and management of inherited and acquired bleeding disorders and thrombotic events that affect children. Special features include updated practical clinical algorithms and appendices that cite normal laboratory reference ranges, bleeding and hypermobility scores, as well as recommended dosages of blood products and major hemostatic agents. An updated chapter on antithrombotic therapy in children includes information on new anticoagulants. A new chapter provides current information about genetic testing and counseling in inherited bleeding and clotting disorders.

Written and reviewed by international experts in the field, this updated handbook is intended for health care professionals involved in the assessment and care of children with inherited and acquired bleeding and clotting disorders. Including general and specialist pediatricians (in particular intensivists, neonatologists, cardiologists/cardiac surgeons, rheumatologists and nephrologists), hematologists/oncologists (pediatric and adult), as well as medical trainees, nurses, nurse practitioners and pharmacists.

Orders may be placed with any bookshop, subscription agency, directly with the publisher, or through a Karger representative:
