Since 1895 an active state-of-the-art platform for research!

Gynecologic and Obstetric Investigation

Editor-in-Chief
T.M. D’Hooghe, Leuven

This journal covers the most active and promising areas of current research in gynecology and obstetrics. Invited, well-referenced reviews by noted experts keep readers in touch with the general framework and direction of international study. Original papers report selected experimental and clinical investigations in all fields related to gynecology, obstetrics and reproduction. Short communications are published to allow immediate discussion of new data. The international and interdisciplinary character of this periodical provides an avenue to less accessible sources and to worldwide research for investigators and practitioners.

Gynecologic and Obstetric Investigation
Founded: 1895
