Ophthalmic Research features original papers and reviews reporting on translational and clinical studies. Authors from throughout the world cover research topics on every field in connection with physical, physiologic, pharmacological, biochemical and molecular biological aspects of ophthalmology. This journal also aims to provide a record of international clinical research for both researchers and clinicians in ophthalmology. Finally, the transfer of information from fundamental research to clinical research and clinical practice is particularly welcome. The journal further offers, at a reasonable price, the possibility of publishing dedicated supplements and abstracts of conferences and symposia. Please consult the managing editor for this.

Conditions

All manuscripts are subject to editorial review. Manuscripts are received with the explicit understanding that they are not under simultaneous consideration by any other publication except in abstract form. Submission of an article for publication implies transfer of the copyright from the author to the publisher upon acceptance. Accepted papers become the permanent property of *Ophthalmic Research* and may not be reproduced by any means, in whole or in part, without the written consent of the publisher. It is the author's responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications. Research involving live human and animal subjects must have been approved by the author's institutional review board. *Ophthalmic Research* requires that in the Methods section of their manuscript the authors state that they adhered to the tenets of the Declaration of Helsinki or the NIH statement for the use of Animals in Research.
