Official Journal of

European Association for
Gastroenterology, Endoscopy
and Nutrition

Digestive Diseases publishes original reports and review articles that describe the most recent advances in diagnostic methods and treatment options for diseases of the gastrointestinal tract and the hepatopancreato-biliary system. The newly established section 'Endoscopy and Imaging' features papers that describe a novel technique, supported by a video. The journal also covers related topics such as microbiota, nutrition and probiotics, endoscopy and imaging. Providing information about the latest clinical evidence and their application in patient care, *Digestive Diseases* is an invaluable source of information for clinicians, specialists and physicians-in-training.

Digestive Diseases

Founded: 1983

Category: Clinical and Basic Research

Field of Interest: Gastroenterology

Listed in bibliographic services, including:

PubMed/MEDLINE, *Web of Science*,
