This open access journal comprises both clinical and basic studies at the interface of nephrology, hypertension and cardiovascular research. The topics to be covered include the structural organization and biochemistry of the normal and diseased kidney, the molecular biology of transporters, the physiology and pathophysiology of glomerular filtration and tubular transport, endothelial and vascular smooth muscle cell function, blood pressure control, renal hormones as well as water, electrolyte and mineral metabolism. Also discussed are the (patho)physiology and (patho)biochemistry, molecular biology, genetics and clinical course of renal disease and hypertension, the renal elimination, action and clinical use of drugs, as well as dialysis and transplantation. Featuring peer-reviewed original papers, editorials translating basic science into patient-oriented research and disease, in depth reviews, and regular special topic sections, Kidney & Blood Pressure Research is an important source of information for researchers in nephrology and cardiovascular medicine.

Benefits for Authors
- rapid peer-review process
- fast online publication
- no limitations on article length
- no color charges (online edition)
- Digital Object Identifiers (DOIs) facilitate the unique and persistent identification of research material

Submission

Kidney & Blood Pressure Research is an open-access, peer-reviewed journal and accepts Original Papers and Reviews at the interface of nephrology, hypertension and cardiovascular research.

Conditions

All articles in this journal are Open Access and meet the requirements of funding bodies or academic institutions. Articles are licensed under the terms of the Creative Commons Attribution-NonCommercial-NoDerivatives 4.0 International license (CC BY-NC-ND). Articles can be read, downloaded, printed, and shared provided that use is for non-commercial purposes only, no modifications or adaptations are made, and proper credit is given to the authors as well as the original publisher. For research funded by the Wellcome Trust, Research Councils UK (RCUK) and other organizations with the same requirements, papers are published under the Creative Commons Attribution 4.0 International license (CC BY 4.0).
