The wORLd of research and practice

ORL contains concise, original scientific papers of interest for both clinicians and researchers in otorhinolaryngology and head and neck surgery. Contributions drawn from the basic sciences cover new knowledge on the anatomy, pathology, pathophysiology, immunology, and tumor biology of the head and neck and the auditory and vestibular system, the salivary glands, paranasal sinuses, and of the organs of the upper respiratory and digestive tract. The practical value of the journal is accentuated by reports of clinical progress in diagnosis and therapy.
