Pharmacology is an international journal committed to sharing the latest findings, news, and concepts pertaining to drug discovery, development, and therapy. Original scientific research presented in this journal stretches from basic to clinical studies, mirroring the scope which spans from bench-to-bedside research to modern reverse translational studies and precision medicine approaches. The journal primarily publishes research articles, reviews and commentaries to encourage knowledge transfer and discussion among the audience with an interest in experimental and clinical pharmacology, toxicology, pharmaceutical medicine, and biomedical sciences.

Submission

The journal publishes articles dealing with all aspects of experimental and clinical pharmacology. Papers dealing with mechanistic aspects at a molecular level are particularly encouraged. They can be full articles as well as short communications of investigative findings and pharmacological profiles. Reviews, comments and perspective notes on timely topics are specifically welcome. Only papers written in English are considered and should be submitted online using the online submission website at:
