**Respiration**

International Journal of Thoracic Medicine

A complete guide to progress in thoracic medicine

*Respiration* brings together the results of both clinical and experimental investigations on all aspects of the respiratory system in health and disease. Clinical improvements in the diagnosis and treatment of chest and lung diseases are covered, as are the latest findings in physiology, biochemistry, pathology, immunology, and pharmacology. The journal includes classic features such as editorials that accompany original articles in clinical and basic science research, reviews, and letters to the editor. Further sections are: “The Eye Catcher”, “What’s Your Diagnosis?”, “New Insights from Clinical Practice”, and “Guidelines”. This modern mix of different features and a stringent peer review process by a dedicated editorial board make *Respiration* a complete guide to progress in thoracic medicine.
