Breast Care
Multidisciplinary Journal for Research, Diagnosis and Therapy

Interdisciplinary perspectives on current topics in breast health, breast ailments, and breast cancer

Breast Care is a scientific journal that encompasses all aspects of breast biology. As an interdisciplinary journal, it includes manuscripts describing research, prevention, diagnosis, and treatment of malignant and benign diseases of the breast. In addition to presenting current developments in clinical research, it addresses broader topics in clinical practice by including articles that address legal, financial, and economic issues of importance. Breast Care is addressed to clinicians and practitioners working and researching in the field of breast health, breast ailments, and breast cancer.
