Liver cancer has a very high prevalence among cancers in general and is one of the most common causes of death worldwide. Based on these facts, the journal *Liver Cancer* serves the growing need to better understand the causes, mechanisms, and therapy of the malignancy. It provides the international community of researchers and clinicians with a platform for their research results, focusing on molecular carcinogenesis, prevention, surveillance, diagnosis, and treatment, including molecular targeted therapy, of the disease. *Liver Cancer* publishes clinical and translational research related to the field of liver cancer in both humans and experimental models in the form of original and review articles.

**Mechanisms, therapies, and guidelines**
