Dermatopathology is a peer-reviewed online-only journal publishing original scientific articles dealing with diagnostic and experimental human and animal studies in dermatopathology. Contributions to clinicopathological correlations, studies based on current molecular technologies as well as controversial issues and case reports are welcome. The aim of the journal is to share interesting and most recent clinicopathological information with the community of dermatopathologists all over the world and to create a stronger link between dermatopathology, clinical dermatology and investigative dermatology. Dermatopathology also provides a resource for continuing medical education in cutaneous pathology. After acceptance, articles are published online very quickly, ensuring the rapid availability of scientific knowledge for all clinicians and researchers interested in this specialty. According to the open-access principle, the contents of the journal can be retrieved at all times without any charge.

Provides recent clinicopathological information for dermatopathologists

Benefits for Authors
• rapid peer-review process
• fast online publication
• no color charges
• Digital Object Identifiers (DOIs) facilitate the unique and persistent identification of research material

Submission
Dermatopathology is an open-access, peer-reviewed online-only journal and accepts Original Papers, Reviews, Case Studies, Research Communications as well as papers on Clinico-Pathological Correlation in the field of dermatopathology.

Please refer to the online guidelines for detailed submission instructions and conditions
