Sparking innovation in health sciences

With its growing range of products and services, Karger wants to support its stakeholders, to understand what inspires them, and to carry on their enthusiasm.
As a worldwide publisher of scientific and medical content we are dedicated to serving the information needs of the scientific community, clinicians and patients. Since 1890 we have been continuously evolving, keeping pace with current developments and shifts in research and publishing. In the light of new opportunities in the publishing and healthcare industries, we now focus more than ever on our stakeholder’s purposes and needs in health sciences, entering new fields of business and intensifying our use of digital technologies. This ambition is reflected in the new logo, which stands for the spark with which every project, every job, and every publication starts.

**Connecting and Advancing Health Sciences**
Discover our transmitters between research and medical practice

Karger’s concise content based on quality scientific findings – for healthcare professionals and patients.
As a specialist you have little time to read all scientific articles relevant to you, evaluate trustworthiness of content, and stay informed. As scientific publishers we do exactly that and turn it into relevant information – to bridge the communication gap between research, healthcare professionals, and patients.

**Fast Facts**

Enabling a dialogue between healthcare professionals, patients and other stakeholders of the healthcare ecosystem and addressing knowledge gaps in healthcare.

More information: www.karger.com/fastfacts

**Karger Kompass**

For clinicians and medical specialists with a focus on young, committed physicians. The heart of the series is the transfer of knowledge from research into practice, with which the experienced advisory board names the relevance of research findings for practical work with patients.

**Monographs**

Featuring selected topics our monographs summarize relevant information specially edited for patients or clinicians.

**dermakonsil**

A digital handbook for dermatologists when diagnosing skin diseases, assisting in differential diagnosis, evaluation of disease state, and therapy. This independent academic resource was developed by a team around Prof. Dr. Alexander Navarini and Vahid Djamei and can be used as application on a mobile device or desktop.

Download: App Store, and Google Play
Services that make the world of research go round: PACS

We connect and advance health sciences in partnership with academic and research institutions, societies, and industry.
Publish

In partnership with institutes, our solutions make it easy for faculty members to publish Open Access with a reputed publisher.

- Publish & Access with APC vouchers, combining access to the complete Karger collection and publishing options in all Karger journals
- Start your own Open Access Partner Publication with Karger: now offering a step by step program for institutions and societies.

Curate

Searching through a flood of content, trying to find and compile the relevant information can be extremely time consuming. We are proud to support you and your faculty in the task of curation and simplify the research process with the AI-based discovery solution Qinsight!

Services

In cooperation with Enago, as of fall 2019 Karger will offer a wide range of educational workshops and trainings for a broad variety of audiences, from young authors just starting their careers to reviewers and editors. All workshops can be held online or in person, depending on your preferred method and setting. Additional services covering more needs will follow in the future.

Access

Complete collection, customized collection, subject package, individual journal subscription or topic article package: let us provide you with an access model that fits your needs!

See further publications:
- ORL
The independent journal of current basic science and clinical research

Audiology and Neurotology provides a forum for the publication of the most advanced and rigorous scientific research related to the basic science and clinical aspects of the auditory and vestibular system and diseases of the ear. This journal seeks submission of cutting-edge research opening up new and innovative fields of study that may improve our understanding and treatment of patients with disorders of the auditory and vestibular systems, their central connections and their perception in the central nervous system. In addition to original papers the journal also offers invited review articles on current topics written by leading experts in the field. The journal is of primary importance for all scientists and practitioners interested in audiology, otology and neurotology, auditory neurosciences and related disciplines.
Folia Phoniatrica et Logopaedia

Official Organ of the International Association of Logopedics and Phoniatrics (IALP)

An international journal of communication sciences and disorders

Published since 1947, Folia Phoniatrica et Logopaedia provides a forum for international research on the anatomy, physiology, and pathology of structures of the speech, language, and hearing mechanisms. Original papers published in this journal report new findings on basic function, assessment, management, and test development in communication sciences and disorders, as well as experiments designed to test specific theories of speech, language, and hearing function. Review papers of high quality are also welcomed.
An interdisciplinary forum for phonetic science research and theory

Contemporary interdisciplinary research on phonetics employs a wide range of approaches, from instrumental measures to perceptual and neurocognitive procedures, to computational modelling, for investigating the properties and principles of phonetics in communicative settings across the world’s languages. It also ranges across styles, types of language users, and communicative modalities (speech, sign, song). *Phonetica* is an international forum for phonetic science that covers all aspects of the subject matter, from phonetic and phonological descriptions, to articulatory and signal analytic measures of production, to perception, acquisition, and phonetic variation and change. *Phonetica* thus provides a platform for a comprehensive understanding of producer-perceiver interaction across languages and dialects, and of learning throughout the lifespan and across contexts. Papers published in this journal report expert original work that deals both with theoretical issues, new empirical data, and innovative methods and applications that help to advance the field.
Cardiovascular System

JOURNALS

- Cardiology
- Journal of Vascular Research
- Pulse

See further publications:
- Cardiorenal Medicine
- Kidney and Blood Pressure Research
- Cerebrovascular Diseases
- Cerebrovascular Diseases Extra
A complete record of recent progress in cardiology

Cardiology features first reports on original clinical, preclinical and fundamental research as well as “Novel Insights from Clinical Experience” and topical comprehensive reviews in selected areas of cardiovascular disease. “Editorial Comments” provide a critical but positive evaluation of a recent article. Papers not only describe but offer critical appraisals of new developments in non-invasive and invasive diagnostic methods and in pharmacologic, nutritional and mechanical/surgical therapies. Readers are thus kept informed of current strategies in the prevention, recognition and treatment of heart disease. Special sections in a variety of subspecialty areas reinforce the journal’s value as a complete record of recent progress for all cardiologists, internists, cardiac surgeons, clinical physiologists, pharmacologists and professionals in other areas of medicine interested in current activity in cardiovascular diseases.
Journal of Vascular Research

Official Journal of the European Society for Microcirculation

FACTS & FIGURES

Editor-in-Chief: U. Pohl (Munich)

Category: Basic Research
Field of Interest: Cardiovascular System
2020: Volume 57, 6 issues per volume
Language: English
Founded: 1964
Impact Factor: 1.855

Listed in bibliographic services, including: PubMed/MEDLINE, Web of Science, Google Scholar, Scopus, Embase

ISSN 1018–1172
e-ISSN 1423–0135

More information: www.karger.com/JVR

A source of current research, new methods and state-of-the-art reviews in vascular biology and microcirculation

The Journal of Vascular Research publishes original articles and reviews of scientific excellence in vascular and microvascular biology, physiology and pathophysiology. The scope of the journal covers a broad spectrum of vascular and lymphatic research, including vascular structure, vascular function, haemodynamics, mechanics, cell signalling, intercellular communication, growth and differentiation. JVR’s “Vascular update” series regularly presents state of the art reviews on hot topics in vascular biology. Manuscript processing times are, consistent with stringent review, kept as short as possible due to electronic submission. All articles are published online first, ensuring rapid publication. The Journal of Vascular Research is the official journal of the European Society of Microcirculation. A biennial prize is awarded to the authors of the best paper published in the journal over the previous two years, thus encouraging young scientists working in the exciting field of vascular biology to publish their findings.

The interdisciplinary journal for basic and clinical vascular research

The journal Pulse publishes full-length reviews, mini reviews, and original papers in the field of vascular research. Bringing together the basic and clinical sciences across a range of disciplines, Pulse provides a forum for communication of the latest findings and hypotheses that enhance our understanding of pulsatile processes and vascular disease. The transdisciplinary approach of the journal fosters collaboration in relevant areas including cardiology, nephrology, neurology, endocrinology and diabetology, gerontology and general medicine. All articles are subject to rigorous peer review in order to maintain the highest standards of publication. The editors welcome submissions from all areas of vascular research, including but not limited to epidemiology, pathophysiology, diagnostics, therapeutics and prevention. Online-first publication ensures prompt dissemination of accepted papers to a multidisciplinary audience with an interest in vascular research.
Cell Biology

BOOK SERIES

• Monographs in Clinical Cytology
Acta Cytologica

The Journal of Clinical Cytology and Cytopathology

Indispensable reading in cytopathology and beyond

With articles offering an excellent balance between clinical cytology and cytopathology, Acta Cytologica fosters the understanding of the pathogenetic mechanisms behind cytomorphology and thus facilitates the translation of frontline research into clinical practice. As the official journal of the International Academy of Cytology and affiliated to over 50 national cytology societies around the world, Acta Cytologica evaluates new and existing diagnostic applications of scientific advances as well as their clinical correlations. Original papers, review articles, meta-analyses, novel insights from clinical practice, and letters to the editor cover topics from diagnostic cytopathology, gynecologic and non-gynecologic cytopathology to fine needle aspiration, molecular techniques and their diagnostic applications.

As the perfect reference for practical use, Acta Cytologica addresses a multidisciplinary audience practicing clinical cytopathology, cell biology, oncology, interventional radiology, otorhinolaryngology, gastroenterology, urology, pulmonology and preventive medicine.

www.karger.com/CTO

Journal of cell and developmental biology, stem cell research, tissue engineering, in vitro systems and regenerative biology

Cells Tissues Organs aims at bridging the gap between cell biology and developmental biology and the emerging fields of regenerative medicine (stem cell biology, tissue engineering, artificial organs, in vitro systems and transplantation biology).

CTO offers a rapid and fair peer review and exquisite reproduction quality. Special topic issues, entire issues of the journal devoted to a single research topic within the range of interests of the journal, are published at irregular intervals.
Monographs in Clinical Cytology

Monographs in this series have given the field of cytology an outstanding set of reference works. Volumes perform the important function of correlating extensive basic and clinical findings and applying these to discuss how innovations in cytology can improve patient diagnosis and management. Readers will find descriptions of techniques offering greater simplicity, speed, patient comfort and cost effectiveness as well as improved diagnostic precision. The immense utility of these texts has resulted in the release of updated second editions of earlier volumes, which continue to meet the popular demand for access to this material.

Vol. 24:
Breast Cytopathology
Assessing the Value of FNAC in the Diagnosis of Breast Lesions
Editors: Pinamonti M.; Zanconati F. (Trieste)
VI + 118 p., 126 fig., 119 in color, 2018

Vol. 23:
Lymph Node FNAC
Cytopathology of Lymph Nodes and Extranodal Lymphoproliferative Processes
Editors: Zeppa P. (Salerno); Cozzolino I. (Naples)
VIII + 116 p., 106 fig., 105 in color, 8 tab., 2018

Vol. 22:
FNA Cytology of Soft Tissue and Bone Tumors
Editors: Domanski, H.A.; Walther, C.S. (Lund)
VIII + 192 p., 109 fig., 108 in color, 8 tab., 2017

Vol. 21:
FNA Cytology of Ophthalmic Tumors
Editors: Biscotti, C.V.; Singh, A.D. (Cleveland, OH)
VIII + 100 p., 83 fig., 81 in color, 6 tab., 2012

Latest achievements in the science, epidemiology and
prevention of dental caries

Caries Research publishes epidemiological, clinical
and laboratory studies in dental caries, fluorosis, erosion and
related dental diseases. Some studies build on the consid-
erable advances already made in caries prevention, e.g. through
fluoride application. Some aim to improve understanding of
the increasingly important problem of dental erosion and the
associated tooth wear process. Others monitor the chang-
ing pattern of caries in different populations, explore improved
methods of diagnosis or evaluate methods of prevention or
treatment. Studies using genetic methods to identify human
genes or mutations associated with caries prevalence are
welcome as are manuscripts using modern high-throughput
sequencing methods to characterise microbial biofilms
associated with oral health and active caries. The broad cov-
erage of innovative research into dental caries is unique and
has given the journal an outstanding international reputation as
an indispensable source for both basic scientists and clinicians
engaged in understanding, investigating and preventing dental
diseases.
Monographs in Oral Science

For over three decades, Monographs in Oral Science has provided a source of in-depth discussion of selected topics in the sciences related to stomatology. Senior investigators are invited to present expanded contributions in their fields of special expertise. The topics chosen are those which have generated a long-standing interest, and on which new conceptual insights or innovative biotechnology are making considerable impact. Authors are selected on the basis of having made lasting contributions to their chosen field and their willingness to share their findings with others.

Vol. 28: The Impact of Nutrition and Diet on Oral Health
Editors: Zohoori, F.V.; Duckworth, R.M. (Middlesborough)
X + 158 p., 9 fig., 7 in color, 10 tab., 2019

Vol. 27: Caries Excavation: Evolution of Treating Cavitated Carious Lesions
Editor: Schwendicke, F. (Berlin); Frencken, J. (Nijmegen); Innes, N. (Dundee)
XII + 176 p., 70 fig., 60 in color, 19 tab., 2018

Vol. 26: Root Caries: From Prevalence to Therapy
Editor: Rocha de Olivera Carrilho, M. (São Paulo)
XII + 136 p., 41 fig., 31 in color, 16 tab., 2017

Vol. 25: Erosive Tooth Wear
From Diagnosis to Therapy
Editors: Lussi, A. (Bern);
Ganss, C. (Giessen)

BOOK SERIES

- Aesthetic Dermatology
- Current Problems in Dermatology
The first dermatology journal dedicated exclusively to case reports

This peer-reviewed online-only journal publishes original case reports covering the entire spectrum of dermatology, including prevention, diagnosis, treatment, toxicities of therapy, supportive care, quality-of-life, and survivorship issues. The journal will also accept case reports dealing with the use of novel technologies, both in the arena of diagnosis and treatment. Supplementary material is welcomed. The intent of the journal is to provide clinicians and researchers with a tool to disseminate their personal experiences to a wider public as well as to review interesting cases encountered by colleagues all over the world. Universally used terms can be searched across the entire growing collection of case reports, further facilitating the retrieval of specific information. Following the open access principle, the entire contents can be retrieved at no charge, guaranteeing easy access to this valuable source of anecdotal information at all times.
Dermatology

Experience and progress – a thought-provoking journal for the dermatologist

Published since 1893, Dermatology provides a worldwide survey of clinical and investigative dermatology. Original papers report clinical and laboratory findings. In order to inform readers of the implications of recent research, reviews prepared by invited, internationally recognized scientists are regularly featured. In addition, the journal publishes papers on novel treatments, surgical pearls, consensus guidelines and industry news. Dermatology offers the analytical dermatologist a broad range of information, from practical problem solving to a deeper mechanistic understanding of skin diseases, while at the same time providing space for further hypotheses that may help to find new solutions to old problems. The journal publishes contributions from across the globe on a wide range of skin-related topics including epidemiology, skin biology, clinical dermatology, and therapy. It enjoys a high reputation in the field of dermatology.

Wissenstransfer aus internationalen Publikationen in den medizinischen Alltag – fundiert, übersichtlich, kompetent

Karger Kompass richtet sich an Kliniker und niedergelassene Fachärzte mit dem Fokus auf vor allem junge engagierte Mediziner. Das Herzstück der Reihe ist der Wissenstransfer aus der Forschung in die Praxis, mit dem der erfahrene Fachbeirat die Relevanz von Forschungserkenntnissen für die praktische Arbeit mit Patienten benennt. Ausgewählte Übersichtsarbeiten und Erfahrungen aus der Praxis finden ebenso Beachtung wie kaleidoskopisch ausgewählte Kurzmeldungen zu allgemein gesundheitspolitischen und fachlichen Entwicklungen in den Bereichen Dermatologie, Onkologie, Ophthalmologie und Pneumologie. Der Campus bietet ein Forum dezidiert für die Belange von Weiterbildungsassistenten.
Skin Appendage Disorders

The first journal exclusively dedicated to research and treatment of hair, nail and skin gland diseases

Skin Appendage Disorders provides a wide range of original and review articles dealing with all aspects of hair, nail and skin glands. The section “Novel Insights from Clinical Practice” introduces special case examples and their treatments. Innovative therapies are presented under the heading “Novel Treatments”, and in “Clinical Investigations” the latest findings are discussed. A special highlight are the articles in the section “Guidelines” that present the consensus treatments, and which are a must-read for everyone who wants to stay up-to-date. The section “Adnexal Surgery” focuses on both established and approved as well as new surgical treatments. Pathological evaluation of skin appendage disorders requires specific training and the “Pathology” section will be open to original papers and reviews on this topic. Covering all aspects of the field, Skin Appendage Disorders is of primary importance for dermatologists in clinics and research, dermatological surgeons as well as cosmetic dermatologists.

The venue for research on new drugs and therapeutic concepts

In the past decade research into skin pharmacology has rapidly developed with new and promising drugs and therapeutic concepts being introduced regularly. Recently, the use of nanoparticles for drug delivery in dermatology and cosmetology has become a topic of intensive research, yielding remarkable and in part surprising results. Another topic of current research is the use of tissue tolerable plasma in wound treatment. Stimulating not only wound healing processes but also the penetration of topically applied substances into the skin, this novel technique is expected to deliver very interesting results.

There are many open questions which reflect the importance of the subject and the need for an international scientific forum where they can be discussed in extenso. Dermatologists, pharmaceutical chemists, pharmacologists, toxicologists, and others interested in the subject are invited to contribute and to submit their best research work for publication in Skin Pharmacology and Physiology.
Aesthetic Dermatology

In the new book series *Aesthetic Dermatology*, innovations in techniques, such as laser therapy, as well as pharmacologic and cosmetic procedures are presented. Each volume is edited by one or several authorities in their respective field who invite contributors from all over the world to share their versatile experience. Thoroughly researched and evidence-based findings are discussed along with innovations in therapy. The series represents an update on key areas of aesthetic dermatology that will interest both plastic surgeons and aesthetic dermatologists.
Current Problems in Dermatology

This series presents a selection of new ideas and information in the field of clinical and investigative dermatology. Crossing the borders of skin diseases it explores interdisciplinary strategies, linking dermatology with immunology, allergology and other research areas. Each volume is individually designed to provide an up-to-date presentation of new and interesting topics in dermatology and skin research. The contributing authors are acknowledged experts in their fields. The wide range of topics discussed includes normal and pathological skin conditions, the development of new equipment, drugs and analytical techniques, and recent advances in the treatments that can be offered to patients.

The first journal on acute medicine dedicated exclusively to case reports

This peer-reviewed online-only journal publishes original case reports covering the entire spectrum of acute medicine, including emergency medicine, intensive care, and disaster medicine. Clinicians and researchers are given a tool to disseminate their personal experience to a wider public as well as to review interesting cases encountered by colleagues all over the world. To complement the contributions supplementary material is welcomed. The journal will also accept case reports dealing with the use of novel technologies, both in the area of diagnosis and treatment. Supplementary material is welcomed. Universally used terms can be searched across the growing collection of case reports, further facilitating the retrieval of specific information. Following the open access principle, the entire contents can be retrieved at no charge, guaranteeing easy access to this valuable source of anecdotal information at all times.

*Title change – Formerly: International Journal of Diabetes and Metabolism

A global source of information to stay on top of scientific developments

Dubai Diabetes and Endocrinology Journal welcomes original contributions on all aspects of diabetes, endocrinology and metabolism. Taking into account that diabetes has become a pandemic, the journal provides a platform for worldwide communication and scientific exchange to researchers and clinicians dealing with diabetes. The focus of the journal lies on the publication of papers on morphological, biochemical, physiological, pathophysiological, and clinical aspects of research on diabetes and metabolism. In addition to research articles, further types of papers such as review articles, case reports, letters, editorials and commentaries make the journal a comprehensive and interesting read. The researcher and practitioner who seeks to stay up-to-date on the developments in the fields of diabetes and metabolism will find a wealth of information in the Dubai Diabetes and Endocrinology Journal.

To improve care of children with endocrine disorders by fostering clinical and translational research

The mission of Hormone Research in Paediatrics is to improve the care of children with endocrine disorders by promoting basic and clinical knowledge. The journal facilitates the dissemination of information through original papers, mini reviews, clinical guidelines and papers on novel insights from clinical practice. Periodic editorials from outstanding paediatric endocrinologists address the main published novelties by critically reviewing the major strengths and weaknesses of the studies.

The international journal for cutting edge research on brain-hormone-body dialogs

Neuroendocrinology publishes papers reporting original research in basic and clinical neuroendocrinology. The journal explores the complex interactions between neuronal networks and endocrine glands (in some instances also immune cells) in both central and peripheral nervous systems. Original contributions cover all aspects of the field, from genetic, molecular and cellular neuroendocrinology, physiology, pharmacology, and the neuroanatomy of neuroendocrine systems to neuroendocrine correlates of behaviour, clinical neuroendocrinology and neuroendocrine cancers. Neuroendocrinology is the official journal of the European Neuroendocrine Tumor Society (ENETS) and includes updates on ENETS guidelines. Readers will also benefit from reviews by noted experts, which highlight especially active areas of current research, and special focus editions of topical interest.
Neuroimmunomodulation

Participate in this rapidly developing field of research

The rapidly expanding area of research known as neuroimmunomodulation explores the way in which the nervous system interacts with the immune system via neural, hormonal, and paracrine actions. Encompassing both basic and clinical research, Neuroimmunomodulation reports on all aspects of these interactions. Basic investigations consider all neural and humoral networks from molecular genetics through cell regulation to integrative systems of the body. The journal also aims to clarify the basic mechanisms involved in the pathogenesis of the CNS pathology in AIDS patients and in various neurodegenerative diseases. Although primarily devoted to research articles, timely reviews are published on a regular basis.

Endocrine Development

This series is devoted to specific areas of fetal, neonatal, pediatric and adolescent endocrinology. It addresses a wide range of relevant issues in the context of a well-defined subject and covers new areas of clinical and basic research. Clear evidence-based guidelines on clinical management by highly qualified basic and clinical scientists who present their clinically relevant recent findings are also provided. Bringing together experts from related disciplines such as fetal and perinatal medicine, epidemiology, public health, molecular endocrinology, the volumes cover a broad spectrum in endocrine development.
Data at the frontiers of diabetes research are collected, systematically organized, and critically evaluated by volumes in this series. Contents are based on recent findings published in the medical literature and reflect the most advanced achievements in current clinical and experimental research on diabetes and allied disorders. By giving these data coherent organization and critical interpretation, the editor and authors of Frontiers in Diabetes perform a major service for all scientists conducting experimental or clinical work in the field.
New sophisticated technologies and methodological approaches in diagnostics and therapeutics have led to significant improvements in identifying and characterizing an increasing number of medical conditions, which is particularly true for all aspects of endocrine and metabolic dysfunctions. Novel insights in endocrine physiology and pathophysiology allow for new perspectives in clinical management and thus lead to the development of molecular, personalized treatments. In view of this, the active interplay between basic scientists and clinicians has become fundamental, both to provide patients with the most appropriate care and to advance future research. The individual volumes of this series explore cutting-edge topics in the field of endocrinology and metabolism, providing the most updated, critical opinions of international leading researchers and clinicians.

Digestion concentrates on clinical research reports: in addition to editorials and reviews, the journal features sections on Stomach/Esophagus, Bowel, Neuro-Gastroenterology, Liver/ Bile, Pancreas, Metabolism/Nutrition and Gastrointestinal Oncology. Papers cover physiology in humans, metabolic studies and clinical work on the etiology, diagnosis, and therapy of human diseases. It is thus especially cut out for gastroenterologists employed in hospitals and outpatient units. Moreover, the journal’s coverage of studies on the metabolism and effects of therapeutic drugs carries considerable value for clinicians and investigators beyond the immediate field of gastroenterology.

The latest in diagnosis and treatment of gastrointestinal disorders

Digestive Diseases publishes original reports and review articles that describe the most recent advances in diagnostic methods and treatment options for diseases of the gastrointestinal tract and the hepato-pancreato-biliary system. The journal also covers related topics such as microbiota, nutrition and probiotics, endoscopy and imaging. Providing information about the latest clinical evidence and their application in patient care, Digestive Diseases is an invaluable source of information for clinicians, specialists and physicians-in-training.
Digestive Surgery

Official Publication of the European Digestive Surgery (EDS)

**An international journal for GI surgeons**

Digestive Surgery presents a comprehensive overview in the field of gastrointestinal surgery. Interdisciplinary in scope, the journal keeps the specialist aware of advances in all fields that contribute to improvements in the diagnosis and treatment of gastrointestinal disease. Particular emphasis is given to articles that evaluate not only recent clinical developments, especially clinical trials and technical innovations such as new endoscopic and laparoscopic procedures, but also relevant translational research. Each contribution is carefully aligned with the need of the digestive surgeon. Thus, the journal is an important component of the continuing medical education of surgeons who want their practice to benefit from a familiarity with new knowledge in all its dimensions.

Gastrointestinal Tumors

An international platform for key opinions and research

Gastrointestinal Tumors is an international, peer-reviewed journal that brings together the leading opinions in all fields related to gastrointestinal cancer research. Ranging from the identification of new therapeutic targets to epidemiology, disease prevention, treatment and patient management, the journal provides a platform for the dissemination of key opinions and research from thought leaders in the field. By publishing timely reviews and original papers covering the latest developments, the journal will help readers gain insight into the evolving body of research across the relevant disciplines.

Clinical and basic research

The GE – Portuguese Journal of Gastroenterology (formerly Jornal Português de Gastrenterologia), founded in 1994, is the official publication of Sociedade Portuguesa de Gastrenterologia (Portuguese Society of Gastroenterology), Sociedade Portuguesa de Endoscopia Digestiva (Portuguese Society of Digestive Endoscopy) and Associação Portuguesa para o Estudo do Fígado (Portuguese Association for the Study of the Liver). The journal publishes clinical and basic research articles on Gastroenterology, Digestive Endoscopy, Hepatology and related topics. Review articles, clinical case studies, images, letters to the editor and other articles such as recommendations or papers on gastroenterology clinical practice are also considered. Only articles written in English are accepted.
Inflammatory Intestinal Diseases

East meets West – An integrative approach

Exchange of knowledge between East and West

Imparting the most current information to physicians caring for patients with intestinal diseases, this journal seeks to identify the basic pathophysiological mechanisms common to different inflammatory intestinal diseases, to compare the environmental conditions involved in their pathogenesis, and to provide important insights into their therapies. *Inflammatory Intestinal Diseases* thus reduces the gap between clinical and basic sciences as well as between hepatology and inflammatory diseases of the intestinal tract such as inflammatory bowel diseases, celiac disease and irritable bowel syndrome. *Inflammatory Intestinal Diseases* also aims to improve the exchange of knowledge between researchers from Eastern and Western countries, which is reflected in the composition of the Editorial Board. The journal accepts randomized controlled clinical trials, observational studies, and cost-effectiveness analyses as well as commentary type and systematic reviews and consensus statements.
Liver Cancer has a very high prevalence among cancers in general and is one of the most common causes of death worldwide. Based on these facts, the journal *Liver Cancer* serves the growing need to better understand the causes, mechanisms and therapy of the malignancy. It provides the international community of researchers and clinicians with a platform for their research results, focusing on molecular carcinogenesis, prevention, surveillance, diagnosis and treatment, including molecular targeted therapy, of the disease. *Liver Cancer* publishes clinical and translational research related to the field of liver cancer in both humans and experimental models in the form of original and review articles.

**Interdisciplinary approach to gastrointestinal medicine and surgery**

This interdisciplinary journal is unique in its field as it covers the principles of both gastrointestinal medicine and surgery required for treating abdominal diseases. In each issue invited reviews provide a comprehensive overview of one selected topic. Thus, a sound background of the state of the art in clinical practice and research is provided. A panel of specialists in gastroenterology, surgery, radiology, and pathology discusses different approaches to diagnosis and treatment of the topic covered in the respective issue. Original articles, case reports, and commentaries make for further interesting reading. The journal is a valuable source of information, imparting essential knowledge for mastering the major interdisciplinary challenges in gastrointestinal medicine and surgery.
Frontiers of Gastrointestinal Research

This series is designed for both the physician active in the clinical practice of gastroenterology and the gastroenterologist or student engaged in research. Each volume offers a ready reference guide to current progress and a review of past achievement in a particular area of gastrointestinal study. The series covers pathological, pharmacological, diagnostic and therapeutic considerations relating to the digestive system, as well as the latest techniques and instrumentation used in the management of gastrointestinal disorders.

The interdisciplinary “hub” for researchers, clinicians and public health professionals

*Biomedicine Hub* is an interdisciplinary journal: a “hub” for researchers, clinicians and public health professionals across biomedical disciplines to share research findings, ideas, theories, experimental results and clinical experience. *Biomedicine Hub* aims at facilitating the exchange of knowledge between disciplines, with a focus on translational science for the development of cutting-edge technologies and the improvement of health care. A further focus is on emerging interdisciplinary fields at the forefront of medicine.
Dubai Medical Journal

Edited in Dubai with an international perspective

The mission of the Dubai Medical Journal is to encourage innovative research by promoting original scientific research in the fields of medicine, health sciences, nursing, pharmaceuticals, and laboratory and other related sciences. Nonclinical subjects related to medicine, especially ethics and complementary medicine as well as social and cultural issues, are also covered. As international as Dubai itself, the journal offers a global perspective, but also focusses on the United Arab Emirates. Partnerships with local and international medical and health authorities are envisaged. The journal facilitates the dissemination of information through research articles, review articles, case reports, editorials, letters, book reviews, meeting reports, and discussions. An educational corner will help to ensure continuous professional development and education. Besides this, the journal also offers a platform for controversies, mythology, and much more.

BOOK SERIES
- Monographs in Human Genetics
A leading journal on human, animal and plant genomes and chromosomes

During the last decades, Cytogenetic and Genome Research has been the leading forum for original reports and reviews in human, animal, insect, and plant cytogenetics, including clinical, molecular, and comparative cytogenetics. With the advance of microarray and high throughput sequencing technologies, many of its papers have centered on genome research, including chromosome structure and function, genome evolution, human disease pathogenesis, cancer genomics, gene regulation and expression, epigenetics, and related areas. Also featured are recent international reports on human and animal chromosome nomenclature. In addition to regular issues, the journal has been publishing a series of topical issues on a broad variety of themes.
Human Heredity

International Journal of Human and Medical Genetics

An excellent source of methodological and applied genetic research

Gathering original research reports and short communications from all over the world, Human Heredity is devoted to methodological and applied research on the genetics of human populations, association and linkage analysis, genetic mechanisms of disease, and new methods for statistical genetics, for example, analysis of rare variants and results from next generation sequencing. The value of this information to many branches of medicine is shown by the number of citations the journal receives in fields ranging from immunology and hematology to epidemiology and public health planning, and the fact that at least 50% of all Human Heredity papers are still cited more than 8 years after publication (according to ISI Journal Citation Reports). Special issues on methodological topics (such as “Consanguinity and Genomics” in 2014; “Integration of Omics Data in Genetic Epidemiology” in 2015) or reviews of advances in particular fields (“Genetic Diversity in European Populations: Evolutionary Evidence and Medical Implications” in 2014; “Genes and the Environment in Obesity” in 2013) are published every year. Renowned experts in the field are invited to contribute to these special issues.

Focusing on research on common and rare genetic disorders and syndromes

Molecular Syndromology publishes high-quality research articles, short reports and reviews on common and rare genetic syndromes, aiming to increase clinical understanding through molecular insights. Topics of particular interest are the molecular basis of genetic syndromes, genotype-phenotype correlation, natural history, strategies in disease management and novel therapeutic approaches based on molecular findings. Research on model systems is also welcome, especially when it is obviously relevant to human genetics. With high-quality reviews on current topics the journal aims to facilitate translation of research findings to a clinical setting while also stimulating further research on clinically relevant questions. The journal targets not only medical geneticists and basic biomedical researchers, but also clinicians dealing with genetic syndromes. With four Associate Editors from three continents and a broad international Editorial Board the journal welcomes submissions covering the latest research from around the world.
Recent discoveries in experimental and clinical research have led to impressive advances in our knowledge of the genetic and environmental mechanisms governing sex determination and differentiation, their evolution as well as the mutations or endocrine and metabolic abnormalities that interfere with normal gonadal development. Sexual Development provides a unique forum for this rapidly expanding field. Its broad scope covers all aspects of genetics, molecular biology, embryology, endocrinology, evolution and pathology of sex determination and differentiation in humans and animals. It publishes high-quality original research manuscripts, review articles, short reports, case reports and commentaries. An internationally renowned and multidisciplinary editorial team of three chief editors, ten prominent scientists serving as section editors, and a distinguished panel of editorial board members ensures fast and author-friendly editorial processing and peer reviewing.
Monographs in Human Genetics

Human genetics represents a highly diversified field covering an ever-increasing number of topics ranging from basic research to medical practice. The well-established book series *Monographs in Human Genetics* focuses on important hereditary diseases, their molecular basis, clinical impact and eventual treatment. With its concise but highly informative reviews by experts from different fields, *Monographs in Human Genetics* provides essential reading not only for researchers but also for physicians and students interested in specific genetic diseases.

**Vol. 21:**
*Genetics of Human Infertility*

Editor: Vogt, P.H. (Heidelberg)
X + 178 p., 24 fig., 16 in color, 8 tab., 2017

**Vol. 20:**
*Genetics of Deafness*

Editors: Vona, B.; Haaf, T. (Würzburg)
X + 146 p., 14 fig., 4 in color, 18 tab., 2016

**Vol. 19:**
*Craniosynostoses*

Molecular Genetics, Principles of Diagnosis, and Treatment
Editors: Muenke, M. (Bethesda, MD); Kress, W.; Collmann, H. (Würzburg); Solomon, B.D. (Bethesda, MD)
X + 250 p., 113 fig., 32 in color, 17 tab., 2011

**Vol. 18:**
*Genetics of Mental Retardation*

An Overview Encompassing Learning Disability and Intellectual Disability
Editor: Knight, S.J.L. (Oxford)
XII + 166 p., 31 fig., 15 in color, 12 tab., 2010

The broadest perspective on a growing challenge

In view of the ever-increasing fraction of older adults, understanding the mechanisms of aging and age-related diseases has become a matter of urgent necessity. Gerontology, the oldest journal in the field, is also the only journal that responds to this need by drawing topical contributions from multiple disciplines to support the fundamental goals of extending active life and enhancing its quality. The range of papers is classified into five sections. In the Clinical Section, the aetiology, pathogenesis, prevention and treatment of age-related diseases are discussed from a gerontological rather than a geriatric viewpoint. The Experimental Section contains up-to-date contributions from basic gerontological research. Papers dealing with behavioural development and related topics are placed in the Behavioural Science Section. Basic aspects of regeneration in different experimental biological systems as well as in the context of medical applications are dealt with in the Regenerative Section whereas the Technological Section contains important information on major technological advances for older adults. Providing a primary source of high-quality papers covering all aspects of aging in humans and animals, Gerontology serves as an ideal information tool for all readers interested in the topic of aging from a broad perspective.
Interdisciplinary Topics in Gerontology and Geriatrics

At a time when interest in the process of aging is driving more and more research, *Interdisciplinary Topics in Gerontology and Geriatrics* offers investigators a way to stay at the forefront of developments. This series represents a comprehensive and integrated approach to the problems of aging and presents pertinent data from studies in animal and human gerontology. In order to provide a forum for a unified concept of gerontology, both the biological foundations and the clinical and sociological consequences of aging in humans are presented. Individual volumes are characterized by an analytic overall view of the aging process, novel ideas, and original approaches to healthy aging as well as age-related functional decline.

Vol. 42: HIV and Aging
Editors: Brennan-Ing, M. (New York, NY); DeMarco, R.F. (Boston, MA)
X + 244 p., 12 fig., 12 tab., 2017

Vol. 41: Frailty in Aging Biological, Clinical and Social Implications
Editors: Theou, O., Rockwood, K. (Halifax, NS)
X + 202 p., 22 fig., 6 tab., 2015

The international forum for high-quality, innovative research in allergy and immunology since 1950

International Archives of Allergy and Immunology provides a forum for experimental and clinical research in modern molecular and cellular allergology and immunology. Appearing monthly, the journal publishes original work in the fields of allergy, immunopathology, immunogenetics, immuno-pharmacology, immunoendocrinology, tumor immunology, mucosal immunity, transplantation and immunology of infectious and connective tissue diseases. In addition to original papers it features short communications, reviews, minireviews, commentaries and opinions. A team of internationally renowned and committed editors guarantees a fair review process, high scientific quality and fast dissemination of significant and novel work.
The Editors of Intervirology invite the submission of manuscripts on a wide range of topics in fundamental and medical virology. The journal's scope encompasses work on the molecular biology of human and animal viruses, including genome organization and regulation, and the structure and function of viral proteins. The pathogenesis, immunology, diagnosis, epidemiology, prophylaxis and therapy of viral diseases are also considered. The journal regularly publishes thematic issues often including timely review articles and field research reports on controversial topics. It aims to be easily accessible to both specialists in the field and to those who want to keep track of the latest developments outside their own area of interest.
Your open access journal in the field of innate immunity

The *Journal of Innate Immunity* is a bimonthly Open Access journal covering research on innate immunity, including humoral, cellular, and clinical aspects. The journal includes original papers and reviews in basic and clinical research. Subject areas such as microbiology, immunology and infectious diseases are also covered. It adheres to a very tight publication schedule: papers are published online within a few weeks of submission. In addition to regular articles, some issues feature a special section with a thematic focus.

Chemical Immunology and Allergy

Appearing for the first time in 1939, Progress in Allergy was the first and, for many years, the only international review series in the English language devoted to immunology. The present title, Chemical Immunology and Allergy, reflects the rapidly increasing role of concepts and techniques of molecular and cell biology, as well as the greater emphasis now being placed on research into the biologic problems of immunology, hypersensitivity and immunopathology. Highly specialized, single-topic volumes keep both investigators and practicing physicians up to date with the latest developments in areas of immunology and allergy where recent research has been concentrated.

Vol. 101: Food Allergy: Molecular Basis and Clinical Practice
Editors: Ebisawa, M. (Sagamihara); Ballmer-Weber, B.K. (Zurich); Vieths, S. (Langen); Wood, R.A. (Baltimore, MD)
XVI + 278 p., 19 fig., 4 in color, 56 tab., 2015

Vol. 100: History of Allergy
Editors: Bergmann, K.-C. (Berlin); Ring, J. (Munich)
X + 426 p., 257 fig., 127 in color, 20 tab., 2014

Vol. 99: Angiogenesis, Lymphangiogenesis and Clinical Implications
Editors: Marone, G.; Granata, F. (Naples)
XII + 232 p., 26 fig., 14 in color, 8 tab., 2014

Vol. 98: Allergy and the Nervous System
Editor: Bienenstock, J. (Hamilton, ON)
XII + 272 p., 51 fig., 4 tab., 2012

The American Journal of Nephrology is a peer-reviewed journal that focuses on timely topics in both basic science and clinical research. Papers are divided into several sections, including:

- Original reports, spanning clinical, basic and outcomes research
- In-depth topic reviews on specific topics selected by the Editor and Associate Editors
- Invited debates – selected on ‘hot topics’ determined by the editorial board

Responding to the ever increasing pace in research, the American Journal of Nephrology adheres to a very tight publication schedule: accepted papers appear online within 5–6 weeks of acceptance.

Blood Purification

Practical information on hemodialysis, hemofiltration, peritoneal dialysis and apheresis is featured in this journal. Recognizing the critical importance of equipment and procedures, particular emphasis has been placed on reports, drawn from a wide range of fields, describing technical advances and improvements in methodology. Papers reflect the search for cost-effective solutions which increase not only patient survival but also patient comfort and disease improvement through prevention or correction of undesirable effects. Advances in vascular access and blood anticoagulation, problems associated with exposure of blood to foreign surfaces and acute-care nephrology, including continuous therapies, also receive attention. Nephrologists, internists, intensivists and hospital staff involved in dialysis, apheresis and immunoadsorption for acute and chronic solid organ failure will find this journal useful and informative. Blood Purification also serves as a platform for multidisciplinary experiences involving nephrologists, cardiologists and critical care physicians in order to expand the level of interaction between different disciplines and specialities.
The journal *CardioRenal Medicine* explores the mechanisms by which obesity and other metabolic abnormalities promote the pathogenesis and progression of heart and kidney disease (cardiorenal metabolic syndrome). It provides an interdisciplinary platform for the advancement of research and clinical practice, focussing on translational issues. Attention is paid to the fact that some metabolic abnormalities cluster with heart and chronic kidney disease, and collectively this is called the cardiorenal metabolic syndrome. Moreover, certain metabolic abnormalities of the heart promote impaired coronary artery endothelial function, diastolic dysfunction and ischemic reconditioning that parallel glomerular hyperfiltration and impairments in proximal tubule handling of sodium and albumin. Another point of focus is the role of the obesity epidemic in promoting the increasing incidence of heart and kidney disease in industrialized countries and the prevailing problems of insufficient exercise and excessive consumption of cheap, unwholesome food in promotion of the cardiorenal metabolic syndrome in both adults and children. *CardioRenal Medicine* addresses a multidisciplinary audience consisting of nephrologists, cardiologists, nutritionists, endocrinologists, physiologists and general internists.
Case Reports in Nephrology and Dialysis

Case Report Journal of the European Society for Paediatric Nephrology (ESPN)

An essential educational tool for your daily clinical practice

This peer-reviewed online-only journal publishes original case reports covering the entire spectrum of nephrology and dialysis, including genetic susceptibility, clinical presentation, diagnosis, treatment or prevention, toxicities of therapy, critical care, supportive care, quality-of-life and survival issues. The journal will also accept case reports dealing with the use of novel technologies, both in the arena of diagnosis and treatment. Supplementary material is welcomed. The intent of the journal is to provide clinicians and researchers with a tool to disseminate their personal experiences to a wider public as well as to review interesting cases encountered by colleagues all over the world. Universally used terms can be searched across the growing collection of case reports, further facilitating the retrieval of specific information. Following the open access principle, the entire contents can be retrieved at no charge, guaranteeing easy access to this valuable source of anecdotal information at all times.

Kidney and Blood Pressure Research

An international journal on experimental and clinical renal and cardiovascular research

This journal comprises both clinical and basic studies at the interface of nephrology, hypertension and cardiovascular research. The topics to be covered include the structural organization and biochemistry of the normal and diseased kidney, the molecular biology of transporters, the physiology and pathophysiology of glomerular filtration and tubular transport, endothelial and vascular smooth muscle cell function and blood pressure control, as well as water, electrolyte and mineral metabolism. Also discussed are the (patho)physiology and (patho)biochemistry of renal hormones, the molecular biology, genetics and clinical course of renal disease and hypertension, the renal elimination, action and clinical use of drugs, as well as dialysis and transplantation. Featuring peer-reviewed original papers, editorials translating basic science into patient-oriented research and disease, in-depth reviews, and regular special topic sections, *Kidney & Blood Pressure Research* is an important source of information for researchers in nephrology and cardiovascular medicine.
Kidney Diseases

The journal for research exchange between East and West

Kidney Diseases aims to provide a platform for the communication of novel research findings from both clinical science and basic research and covers the entire spectrum of nephrological disorders. The journal has a particular interest in publishing research that supports communication and exchange of knowledge between East and West. The basic research section includes experimental work in animal models and in vitro. Clinical trials, observational studies, and other original clinical research work related to kidney diseases are the focus of the clinical science section. Moreover, important studies on hemodialysis and peritoneal dialysis are also considered. Invited review articles and editorials by renowned experts and high-quality rapid communications round off the contents of the journal.

Nephron

A critical look at hot issues in nephrology

Nephron comprises two sections, “Clinical Practice” and “Experimental Nephrology and Genetics”, which are each under the editorship of internationally recognized leaders and served by specialized and young Associate Editors. Apart from high-quality original research, Nephron publishes invited reviews/minireviews on up-to-date topics. The section “Clinical Practice” also includes Second Opinion articles that provide a platform for international experts and opinion leaders to cast a critical eye over published papers dealing with hot topics in clinical and experimental nephrology. The section “Experimental Nephrology and Genetics” includes Case Studies of Genetic Interest articles that provide clinically relevant examples of the genetic heterogeneity of renal diseases. Finally, Special Articles cover a broad range of topics, offering a human-interest perspective on medical/scientific issues with a strong emotional and societal impact. They are published on an ad-hoc basis upon invitation.
Contributions to Nephrology

The speed of developments in nephrology has been fueled by the promise that new findings may improve the care of patients suffering from renal disease. Participating in these rapid advances, this series has released an exceptional number of volumes that explore problems of immediate importance for clinical nephrology. Focus ranges from discussion of innovative treatment strategies to critical evaluations of investigative methodology. The value of regularly consolidating the newest findings and theories is enhanced through the inclusion of extensive bibliographies which make each volume a reference work deserving careful study.

Brain, Behavior and Evolution is a journal with a loyal following, high standards, and a unique profile as the main outlet for the continuing scientific discourse on nervous system evolution. The journal publishes comparative neurobiological studies that focus on nervous system structure, function, or development in vertebrates as well as invertebrates. Approaches range from the molecular over the anatomical and physiological to the behavioral. Despite this diversity, most papers published in Brain, Behavior and Evolution include an evolutionary angle, at least in the discussion, and focus on neural mechanisms or phenomena. Some purely behavioral research may be within the journal’s scope, but the suitability of such manuscripts will be assessed on a case-by-case basis. The journal also publishes review articles that provide critical overviews of current topics in evolutionary neurobiology.

The latest in stroke research

The rapidly growing field of stroke and cerebrovascular research is unique in that it involves a variety of specialties such as neurology, internal medicine, surgery, radiology, epidemiology, cardiology, hematology, psychology and rehabilitation. Cerebrovascular Diseases is an international forum which meets the growing need for sophisticated, up-to-date scientific information on clinical data, diagnostic testing, and therapeutic issues, dealing with all aspects of stroke and cerebrovascular diseases. It contains original contributions, reviews of selected topics and clinical investigative studies, recent meeting reports and work-in-progress as well as discussions on controversial issues. All aspects related to clinical advances are considered, while purely experimental work appears if directly relevant to clinical issues. The open access journal Cerebrovascular Diseases Extra provides additional contents based on reviewed and accepted submissions to the main journal Cerebrovascular Diseases on www.karger.com/cee.
Cerebrovascular Diseases Extra

An open-access subjournal to Cerebrovascular Diseases

This open access and online-only journal publishes original articles covering the entire spectrum of stroke and cerebrovascular research, drawing from a variety of specialties such as neurology, internal medicine, surgery, radiology, epidemiology, cardiology, hematology, psychology and rehabilitation. Offering an international forum, it meets the growing need for sophisticated, up-to-date scientific information on clinical data, diagnostic testing, and therapeutic issues. The journal publishes original contributions, reviews of selected topics as well as clinical investigative studies. All aspects related to clinical advances are considered, while purely experimental work appears only if directly relevant to clinical issues.

Cerebrovascular Diseases Extra provides additional contents based on reviewed and accepted submissions to the main journal Cerebrovascular Diseases.
Dementia and Geriatric Cognitive Disorders

A unique journal devoted to the study of cognitive dysfunction in preclinical and clinical studies

As a unique forum devoted exclusively to the study of cognitive dysfunction, Dementia and Geriatric Cognitive Disorders concentrates on Alzheimer’s and Parkinson’s disease, Huntington’s chorea and other neurodegenerative diseases. The journal draws from diverse related research disciplines such as psychogeriatrics, neuropsychology, clinical neurology, morphology, physiology, genetic molecular biology, pathology, biochemistry, immunology, pharmacology and pharmaceutics. Strong emphasis is placed on the publication of research findings from animal studies which are complemented by clinical and therapeutic experience to give an overall appreciation of the field. The open access journal Dementia and Geriatric Cognitive Disorders Extra provides additional contents based on reviewed and accepted submissions to the main journal Dementia and Geriatric Cognitive Disorders on www.karger.com/dee.
Dementia and Geriatric Cognitive Disorders Extra

An open-access subjournal to Dementia and Geriatric Cognitive Disorders

This open access and online-only journal publishes original articles covering the entire spectrum of cognitive dysfunction such as Alzheimer’s and Parkinson’s disease, Huntington’s chorea and other neurodegenerative diseases. The journal draws from diverse related research disciplines such as psychogeriatrics, neuropsychology, clinical neurology, morphology, physiology, genetic molecular biology, pathology, biochemistry, immunology, pharmacology and pharmaceutics. Strong emphasis is placed on the publication of research findings from animal studies which are complemented by clinical and therapeutic experience to give an overall appreciation of the field. Dementia and Geriatric Cognitive Disorders Extra provides additional contents based on reviewed and accepted submissions to the main journal Dementia and Geriatric Cognitive Disorders.
Gain new insights into the mechanisms of normal and abnormal brain development

Developmental Neuroscience is a multidisciplinary journal publishing papers covering all stages of invertebrate, vertebrate and human brain development. Emphasis is placed on publishing fundamental as well as translational studies that contribute to our understanding of mechanisms of normal development as well as genetic and environmental causes of abnormal brain development. The journal thus provides valuable information for both physicians and biologists. To meet the rapidly expanding information needs of its readers, the journal combines original papers that report on progress and advances in developmental neuroscience with concise mini-reviews that provide a timely overview of key topics, new insights and ongoing controversies.

Get complete coverage of clinical research and practice

European Neurology publishes original papers, reviews and letters to the editor. Papers presented in this journal cover clinical aspects of diseases of the nervous system and muscles, as well as their neuropathological, biochemical, and electrophysiological basis. New diagnostic probes, pharmacological and surgical treatments are evaluated from clinical evidence and basic investigative studies. The journal also features original works and reviews on the history of neurology.
Neurodegenerative Diseases

The international journal of translational research on the nervous system

Neurodegenerative Diseases is a bimonthly, multidisciplinary journal for the publication and discussion of advances in research on all aspects of neurodegenerative diseases. The journal focuses on Alzheimer disease, Parkinson disease, amyotrophic lateral sclerosis, and Huntington disease, but will also welcome articles on related neurological and psychiatric disorders. A particular thematic focus is set on the interplay between vascular pathology, neuroinflammatory change, and the progression of neurodegenerative disease. In addition to clinical and basic science studies, brief methodological papers are welcome. This includes the emerging fields of statistical genetics, clinical and preclinical neuroimaging, novel algorithms of biomedical image computing, and basic science approaches to elucidate mechanisms of neurodegenerative disease. Neurodegenerative Diseases accepts high-quality papers in the form of brief reports, original research, or review articles from a broad spectrum of scientific research areas ranging from neuroscience and genetics to clinical and preclinical neuroimaging and biomarker studies, molecular and cell biology as well as pharmacology. All articles will undergo rigorous scientific as well as statistical/bioinformatic review to ensure excellence.
Neuroepidemiology

The only journal devoted to the research on neurological diseases frequency, distribution and determinants in human populations

Neuroepidemiology is the only internationally recognised peer-reviewed periodical devoted to descriptive, analytical and experimental studies in the epidemiology of neurologic disease. The scope of the journal expands the boundaries of traditional clinical neurology by providing new insights regarding the etiology, determinants, distribution, management and prevention of diseases of the nervous system. In order to meet the demands of the ever increasing pace in research, Neuroepidemiology is committed to reduce its online publication span to approx. six weeks after acceptance: papers will be published online first, and their printed version will be included in the next scheduled issue. The journal enjoys a high scientific reputation with a continually increasing impact factor and an equally high circulation.

Pediatric Neurosurgery

Focused, thought-provoking and independent

Pediatric Neurosurgery strives to publish new information and observations in pediatric neurosurgery, neurology, neuroradiology and neuropathology. The focus is on the etiology of neurologic diseases, the operative care of affected patients and outcomes research. In addition to experimental and clinical studies, the journal presents critical reviews on selected topics as well as case histories and reports on advances in surgical technique. This thought-provoking approach encourages dissemination of information from neurosurgeons and neuroscientists around the world. Published material will be of interest to both researchers and clinicians who study and care for patients with pediatric, congenital, and developmental diseases of the nervous system.

Keep up-to-date on all aspects of stereotactic intervention, functional neurosurgery, and related technology

Stereotactic and Functional Neurosurgery provides a single source for the reader to keep abreast of developments in the most rapidly advancing subspecialty within neurosurgery. Technological advances in computer-assisted surgery, robotics, imaging and neurophysiology are being applied to clinical problems with ever-increasing rapidity in stereotaxis more than any other field, providing opportunities for new approaches to surgical and radiotherapeutic management of diseases of the brain, spinal cord, and spine. Issues feature advances in the use of deep-brain stimulation, imaging-guided techniques in stereotactic biopsy and craniotomy, stereotactic radiosurgery, and stereotactically implanted and stereotactically guided radiotherapeutics and biologicals in the treatment of functional and movement disorders, brain tumors, and other diseases of the brain. Background information from basic science laboratories related to such clinical advances provides the reader with an overall perspective of this field. Proceedings and abstracts from many of the key international meetings furnish an overview of this specialty available nowhere else. Stereotactic and Functional Neurosurgery meets the information needs of both investigators and clinicians in this rapidly advancing field.
Frontiers of Neurology and Neuroscience

Focusing on topics in the fields of both neuroscience and neurology, this series provides current and unique information in basic and clinical advances on the nervous system and its disorders.

Progress in Neurological Surgery

Published since 1966, this series has become universally recognized as the most significant group of books serving neurological surgeons. Volumes feature contributions from distinguished international physicians and surgeons who review the literature from the perspective of their own personal experience. The result is a series of works providing critical distillations of developments of central importance to the theory and practice of neurological surgery.

Annals of Nutrition and Metabolism

Annals of Nutrition and Metabolism is a leading international peer-reviewed journal for sharing information on human nutrition, metabolism and related fields, covering the broad and multidisciplinary nature of science in nutrition and metabolism. The journal focuses on human nutrition and metabolism and related areas, including experimental studies and basic science that can inform human nutrition science. We welcome manuscripts describing observational and intervention studies as well as basic science reports on the topics of foods, diets and dietary supplements, nutrigenomics and genetics related to metabolism, on energy metabolism, macro- and micronutrients including vitamins and minerals, biofunctional compounds, dietetics, obesity, clinical nutrition, social sciences and health economy as related to nutrition and metabolism and nutrition policy. Laboratory-based science may include descriptions of relevant experimental models. In addition to Original Papers, the journal will publish Review Articles on topical subjects, Systematic Reviews, short Commentaries and Viewpoint articles that may address current controversies, short Meeting Reports, Letters to the Editor, and Announcements/Society News. The journal will also publish Supplements with proceedings from internationally relevant conferences on nutrition and metabolism.

The journal will also publish Supplements with proceedings from internationally relevant conferences on nutrition and metabolism.
Case Reports in Clinical Nutrition

The first clinical nutrition journal dedicated exclusively to case reports

This new and exciting peer-reviewed Open Access journal focuses on publishing original case reports in clinical nutrition of both adults and children, an area which is still underrated. Contributions cover the entire field of clinical nutrition, including prevention, diagnosis, and treatment in the out- and in-patient setting. Case Reports in Clinical Nutrition not only gives clinicians, researchers, and dietitians the opportunity to share their knowledge and experience with a wide and interested readership, but also provides a chance to review exciting cases from colleagues worldwide. In line with the principle of Open Access, the entire contents of the journal can be retrieved without charge, assuring easy access to this valuable source of case reports with the aim to improve patient care.

Lifestyle-gene interactions and their influence on health and disease

Lifestyle Genomics aims to provide a forum for highlighting new advances in the broad area of lifestyle-gene interactions and their influence on health and disease. The journal welcomes novel contributions that investigate how genetics may influence a person’s response to lifestyle factors, such as diet and nutrition, natural health products, physical activity, and sleep, amongst others. Additionally, contributions examining how lifestyle factors influence the expression/abundance of genes, proteins and metabolites in cell and animal models as well as in humans are also of interest. The journal will publish high-quality original research papers, brief research communications, reviews outlining timely advances in the field, and brief research methods pertaining to lifestyle genomics. It will also include a unique section under the heading “Market Place” presenting articles of companies active in the area of lifestyle genomics. Research articles will undergo rigorous scientific as well as statistical/bioinformatic review to ensure excellence.

The multidisciplinary online journal for obesity research and therapy

Obesity Facts publishes articles covering all aspects of obesity, in particular epidemiology, etiology and pathogenesis, treatment, and the prevention of adiposity. As obesity is related to many disease processes, the journal is also dedicated to all topics pertaining to comorbidity and covers psychological and sociocultural aspects as well as influences of nutrition and exercise on body weight. The editors carefully select papers to present only the most recent findings in clinical practice and research. All professionals concerned with obesity issues will find this journal a most valuable update to keep them abreast of the latest scientific developments. Special sections comprising a variety of subspecialties reinforce the journal’s value as an exhaustive record of recent progress for all internists, gastroenterologists, endocrinologists, pediatricians, dieticians, nutritionists, bariatric surgeons, psychologists and psychiatrists, occupational health practitioners, sports medicine specialists, ecotrophologists, sociologists, and biologists as well as prevention and public health researchers. In addition, Obesity Facts serves as an ideal information tool for the members of the pharmaceutical and food industry as well as those active in nutritional research and medicine.
In 2011, the two book series Nestlé Nutrition Workshop Series: Pediatric Program and Nestlé Nutrition Workshop Series: Clinical & Performance Program merged to form the Nestlé Nutrition Institute Workshop Series. One of the major components of the series is the organization of workshops and the publication of the proceedings. Each workshop focuses on the latest findings, the controversies and further research needs concerning various topics in nutrition. The books of this series will be of great assistance to pediatricians, clinical investigators, sports scientists as well as health workers and nutritionists concerned with both adult and pediatric health and nutrition.

World Review of Nutrition and Dietetics

Volumes in this series consist of exceptionally thorough reviews on topics selected as either fundamental to improved understanding of human and animal nutrition, useful in resolving present controversies, or relevant to problems of social and preventive medicine that depend for their solution on progress in nutrition. Many of the individual articles have been judged as among the most comprehensive reviews ever published on the given topic. Since the first volume appeared in 1959, the series has earned repeated praise for the quality of its scholarship and the reputation of its authors.

The single source that encompasses the entire discipline

The first journal to focus on the fetus as a patient, Fetal Diagnosis and Therapy provides a wide range of biomedical specialists with a single source of reports encompassing the common discipline of fetal medicine. The journal includes peer-reviewed original research papers, spanning from basic and pathophysiologic investigations to clinical studies in fetal diagnosis and therapy. In addition, the journal addresses timely topics of wide interest in a section dedicated to Reviews and Mini Reviews, where specific clinical questions are covered by internationally renowned experts. Finally, two sections, Novel Insights in Fetal Medicine and Images in Fetal Medicine, are dedicated to particularly interesting case reports with a special focus on cases documented by means of multimodal imaging.
Since 1895 an active state-of-the-art platform for research!

This journal covers the most active and promising areas of current research in gynecology and obstetrics. Invited, well-referenced reviews by noted experts keep readers in touch with the general framework and direction of international study. Original papers report selected experimental and clinical investigations in all fields related to gynecology, obstetrics and reproduction. Short communications are published to allow immediate discussion of new data. The international and interdisciplinary character of this periodical provides an avenue to less accessible sources and to worldwide research for investigators and practitioners.
Fetal and neonatal research: from basic science to clinical practice

This highly respected and frequently cited journal is a prime source of information in the area of fetal and neonatal research. Original papers present research on all aspects of neonatology, fetal medicine and developmental biology. These papers encompass both basic science and clinical research including randomised trials, observational studies and epidemiology. Basic science research covers molecular biology, molecular genetics, physiology, biochemistry and pharmacology in fetal and neonatal life. In addition to the classic features the journal accepts papers for the sections Research Briefings, Sources of Neonatal Medicine (historical pieces) and Research Methods in Neonatal Medicine. Papers reporting results of animal studies should be based upon hypotheses that relate to developmental processes or disorders in the human fetus or neonate.
Pediatric and Adolescent Medicine

This series deals with rapidly evolving pediatric subspecialties such as perinatal medicine, pediatric endocrinology, immunology, neurology and cardiology. The individual volumes not only highlight recent advances in a particular area, but also provide a comprehensive overview of new trends in monitoring child development and subsequent adult health. The series aims to inform both the general practitioner and the hospital physician about current theoretical and practical developments in pediatric and adolescent medicine.

Acta Haematologica

A single source for international hematology research and clinical practice since 1948

Acta Haematologica is a well-established and internationally recognized clinically oriented journal featuring balanced, wide-ranging coverage of current hematology research. A wealth of information on such problems as anemia, leukemia, lymphoma, multiple myeloma, hereditary disorders, blood coagulation, growth factors, hematopoiesis and differentiation is contained in first-rate basic and clinical papers - some of which are accompanied by editorial comments by eminent experts. These are supplemented by short state-of-the-art communications, reviews and correspondence as well as occasional special issues devoted to ‘hot topics’ in hematology. Cutting-edge clinical information, along translational research relevant to clinical daily life, will keep the practicing hematologist well informed of the new developments in the field.

Breast Care is a peer-reviewed scientific journal that covers all aspects of breast biology. Due to its interdisciplinary perspective, it encompasses articles on basic research, prevention, diagnosis, and treatment of malignant diseases of the breast. In addition to presenting current developments in clinical research, the scope of clinical practice is broadened by including articles on relevant legal, financial and economic issues. Breast Care is addressed to clinicians and practitioners working and researching in the field of breast health, breast ailments and breast cancer.

Case Reports in Oncology

The first oncology journal dedicated exclusively to case reports

This peer-reviewed online-only journal publishes original case reports covering the entire spectrum of oncology, including prevention, diagnosis, treatment, toxicities of therapy, supportive care, quality-of-life, and survivorship issues. The journal will also accept case reports dealing with the use of novel technologies, both in the arena of diagnosis and treatment. Supplementary material is welcomed. The intent of the journal is to provide clinicians and researchers with a tool to disseminate their personal experiences to a wider public as well as to review interesting cases encountered by colleagues all over the world. Universally used terms can be searched across the entire growing collection of case reports, further facilitating the retrieval of specific information. Following the open access principle, the entire contents can be retrieved at no charge, guaranteeing easy access to this valuable source of anecdotal information at all times.

An international forum on all aspects of antimicrobial and antitumor chemotherapy

This journal publishes original research articles and state-of-the-art reviews on all aspects of antimicrobial and antitumor chemotherapy. The results of experimental and clinical investigations into the microbiological and pharmacologic properties of antibacterial, antiviral and antitumor compounds are major topics of publication. Papers selected for the journal offer data concerning the efficacy, toxicology, and interactions of new drugs in single or combined applications. Studies designed to determine the pharmacokinetic and pharmacodynamic properties of similar preparations and comparing their efficacy are also included. Special emphasis is given to the development of drug resistance, an increasing problem worldwide.

Your source for important clinical and translational laboratory studies from around the world

Although laboratory and clinical cancer research need to be closely linked, observations at the basic level often remain removed from medical applications. This journal works to accelerate the translation of experimental results into the clinic, and back again into the laboratory for further investigation. The fundamental purpose of this effort is to advance clinically relevant knowledge of cancer, and improve the outcome of prevention, diagnosis and treatment of malignant disease. The journal publishes significant clinical studies from cancer programs around the world, along with important translational laboratory findings, mini-reviews (invited and submitted) and in-depth discussions of evolving and controversial topics in the oncology arena. A unique feature of the journal is a section which focuses on rapid peer-review and subsequent publication of short reports of phase 1 and phase 2 clinical cancer trials, with a goal of insuring that high-quality clinical cancer research quickly enters the public domain, regardless of the trial’s ultimate conclusions regarding efficacy or toxicity.
Oncology Research and Treatment

Oncology Research and Treatment offers an interdisciplinary forum for cancer research and treatment. Peer-reviewed original and review articles cover a wide range of aspects in medical hematology and oncology, surgical, neurosurgical, gynecological, pediatric and urological oncology, oral and maxillofacial surgery, dermatological oncology, diagnostics, radiation oncology, psychological care, pathology, clinical-translational oncology, biometry, and oncological rehabilitation. Continuous medical education and clinical news form a further focus. Compact and current, Oncology Research and Treatment keeps both clinicians and researchers up to date.

Innovative coverage of recent advances in translational medical research

Pathobiology offers a valuable platform for the publication of high-quality original research into the mechanisms underlying human disease. Aiming to serve as a bridge between basic biomedical research and clinical medicine, the journal welcomes articles from scientific areas such as pathology, oncology, anatomy, virology, internal medicine, surgery, cell and molecular biology, and immunology. Published bimonthly, Pathobiology features original research papers and reviews on translational research. The journal offers the possibility to publish proceedings of meetings dedicated to one particular topic.

Interdisciplinary journal for transfusion medicine, hemotherapy, immunohematology, and clinical hemostasis

This journal is devoted to all areas of transfusion medicine. These include the quality and security of blood products, therapy with blood components and plasma derivatives, transfusion-related questions in transplantation, stem cell manipulation, therapeutic and diagnostic problems of hemostasis, immuno-hematological investigations, and legal aspects of the production of blood products as well as hemotherapy. Both comprehensive reviews and primary publications that detail the newest work in transfusion medicine and hemotherapy promote the international exchange of knowledge within these disciplines. Consistent with this goal, continuing clinical education is also specifically addressed.
Progress in Tumor Research

The scientific book series Progress in Tumor Research aims to provide in-depth information about important developments in cancer research. The individual volumes are authored and edited by experts to provide detailed coverage of topics selected as either representing controversial issues or belonging to areas where the speed of developments necessitates the kind of assistance offered by integrative, critical reviews.

Ophthalmologie

Wissenstransfer aus internationalen Publikationen in den medizinischen Alltag – fundiert, übersichtlich, kompetent

Karger Kompass richtet sich an Kliniker und niedergelassene Fachärzte mit dem Fokus auf vor allem junge engagierte Mediziner. Das Herzstück der Reihe ist der Wissenstransfer aus der Forschung in die Praxis, mit dem der erfahrene Fachbeirat die Relevanz von Forschungserkenntnissen für die praktische Arbeit mit Patienten benennt. Ausgewählte Übersichtsarbeiten und Erfahrungen aus der Praxis finden ebenso Beachtung wie kaleidoskopisch ausgewählte Kurzmeldungen zu allgemein gesundheitspolitischen und fachlichen Entwicklungen in den Bereichen Dermatologie, Onkologie, Ophthalmologie und Pneumologie. Der Campus bietet ein Forum dezidiert für die Belange von Weiterbildungsassistenten.

Your source for clinical and basic research in ophthalmology with special focus on oncology and pathology

Ocular Oncology and Pathology provides a selection of topical clinical and basic research articles covering the etiology, pathology, diagnostic techniques, imaging features, and advances in medical and surgical treatment of ophthalmic cancers. The focus lies on clinicopathologic correlations, evidence-based clinical studies and translational science. In addition to original papers, Ocular Oncology and Pathology features timely reviews, controversial topics, and summaries of related articles to ensure that its readers remain well informed.

Vision in focus

Ophthalmic Research features original papers and reviews reporting on translational and clinical studies in the field of ophthalmology and vision research. The journal emphasizes hypothesis-based clinical and laboratory research with statistically valid results that clearly advance the fields of ophthalmic and vision research. It also aims to provide a record of international clinical research for both researchers and clinicians in ophthalmology. Finally, the transfer of information from fundamental research to clinical research and clinical practice is particularly welcome.
Ophthalmologica

Clinical research in ophthalmology with special focus on management of retina and vitreous diseases

Published since 1899, Ophthalmologica has become a frequently cited guide to international work in clinical and experimental ophthalmology. It contains a selection of patient-oriented contributions covering the etiology of eye diseases, diagnostic techniques, and advances in medical and surgical treatment, with special emphasis on retinal diseases. In addition to original papers, Ophthalmologica features regularly timely reviews in an effort to keep the reader well informed and updated. The large international circulation of this journal reflects its importance.
Developments in Ophthalmology

The book series *Developments in Ophthalmology* provides ophthalmologists, ophthalmic surgeons and practicing optometrists with expert reviews highlighting the most important developments in their field. Innovative procedures from a wide range of areas – such as corneal or macular disorders, pharmacological issues, OCT and many more – are presented with the appropriate technical information required to encourage rapid introduction into clinical practice. For each volume expert authors producing articles of only the highest standards are invited to present their knowledge. During the considerable history of its existence *Developments in Ophthalmology* has established itself as an essential reference in the field of ophthalmology.
ESASO Course Series

This book series makes the essentials of the courses of the European School for Advanced Studies in Ophthalmology (ESASO) available to interested ophthalmologists, optometrists, technicians and residents all over the world. The presentations of the courses are published regularly featuring a wide range of ophthalmological topics from vitreoretinal pathology to retinal surgery, retinal diseases, cornea and refractive surgery or cataract.

The scientific background of marihuana

Medical Cannabis and Cannabinoids is a peer-reviewed journal offering an international forum to present and discuss recent advances in the rapidly developing and challenging field of the medical use of cannabis and cannabinoids. It seeks to bridge the gap between empirical and evidence-based clinical medicine by covering current basic and applied as well as translational research topics. In addition to original papers, reviews and mini-reviews this journal features short communications, case-reports, technical notes, letters, and conference proceedings.
Pharmacology

International Journal of Experimental and Clinical Pharmacology

The search for innovative and effective drugs begins here

Pharmacology is an international forum to present and discuss current perspectives in drug research. The journal communicates research in basic and clinical pharmacology and related fields. It covers biochemical pharmacology, molecular pharmacology, immunopharmacology, drug metabolism, pharmacogenetics, analytical toxicology, neuropsychopharmacology, pharmacokinetics and clinical pharmacology. In addition to original papers and short communications of investigative findings and pharmacological profiles, the journal contains reviews, comments and perspective notes; research communications of novel therapeutic agents are encouraged.

Respiration 

International Journal of Thoracic Medicine

Official Journal of the European Association for Bronchology and Interventional Pulmonology

Respiration brings together the results of both clinical and experimental investigations on all aspects of the respiratory system in health and disease. Clinical improvements in the diagnosis and treatment of chest and lung diseases are covered, as are the latest findings in physiology, biochemistry, pathology, immunology and pharmacology. The journal includes classic features such as editorials that accompany original articles in clinical and basic science research, reviews and letters to the editor. Further sections are: The Eye Catcher, What's Your Diagnosis?, New Insights from Clinical Practice and Guidelines. Respiration is the official journal of the Swiss Respiratory Society (SGP) and also home to the European Association for Bronchology and Interventional Pulmonology (EABIP), which occupies a dedicated section on Interventional Pulmonology in the journal. This modern mix of different features and a stringent peer-review process by a dedicated editorial board make Respiration a complete guide to progress in thoracic medicine.

Progress in Respiratory Research

Important aspects of the respiratory system, from its role in the alimentation and protection of the organism to its susceptibility to disease, receive attention in the volumes published in this series. Some volumes present debates on topics vital to respiratory research. Others represent the unique experiences of a single renowned author and stand as first-time treatments of specific issues. “The blue series” is designed for researchers as well as clinicians and extends to them a collection of valuable reference tools.

Substance abuse and behavioral addictions

European Addiction Research is a unique international scientific journal for the rapid publication of innovative research covering all aspects of addiction and related disorders. Representing an interdisciplinary forum for the exchange of recent data and expert opinion, it reflects the importance of a comprehensive approach to resolve the problems of substance abuse and addiction in Europe. Coverage ranges from clinical and research advances in the fields of psychiatry, biology, pharmacology and epidemiology to social, and legal implications of policy decisions. The goal is to facilitate open discussion among those interested in the scientific and clinical aspects of prevention, diagnosis and therapy as well as dealing with legal issues. An excellent range of original papers makes European Addiction Research the forum of choice for all.

Offers new insights into human development throughout the life span

Distinguished by its international recognition since 1958, Human Development publishes in-depth conceptual articles, commentaries, and essay book reviews that advance our understanding of developmental phenomena. Contributions serve to raise theoretical issues, flesh out interesting and potentially powerful ideas, and differentiate key constructs. Contributions come primarily from developmental psychology. Contributions are also welcomed from varied disciplines, including anthropology, biology, education, history, philosophy, psychology, and sociology.
Molecular Neuropsychiatry

Official Journal of the MPA Molecular Psychiatry Association

Molecular Neuropsychiatry is a peer reviewed, rapid communication journal that focuses on the complexity of psychiatry and human behavior considering a wide range of methods – including genomics, epigenomics, transcriptomics, proteomics, metabolomics, pharmacogenomics, bioinformatics, molecular neuropharmacology, neural circuits, neural stem cells, and systems neurobiology in humans, and in animal and cellular model systems. The journal publishes original research articles and reviews that shed light on the biology of psychiatric illness and complex behavioral traits. Submitted papers will be subject to an editorial review and a decision whether to further peer review will be made in approximately five business days. We aim to have an initial review decision within one month. Simultaneous BioRxiv submission is strongly encouraged.

Neuropsychobiology

International Journal of Experimental and Clinical Research in Biological Psychiatry, Pharmacopsychiatry, Biological Psychology/Pharmacopsychology and Pharmacoelectroencephalography

Official Journal of
• Japanese Pharmaco-EEG Society (JPEEG)
• International Pharmaco EEG Society (IPEG)

The translational approach to behavior and mental disorders

The biological approach to mental disorders continues to yield innovative findings of clinical importance, particularly if methodologies are combined. This journal collects high-quality empirical studies from various experimental and clinical approaches in the fields of biological psychiatry, biological psychology and neuropsychology. It features original, clinical and basic research in the fields of neurophysiology and functional imaging, neuropharmacology and neurochemistry, neuroendocrinology and neuroimmunology, genetics and their relationships with normal psychology and psychopathology. In addition, the reader will find studies on animal models of mental disorders and therapeutic interventions, and pharmacoelectroencephalographic studies. Regular reviews report new methodologic approaches, and selected case reports provide hints for future research. Neuropsychobiology is a complete record of strategies and methodologies employed to study the biological basis of mental functions including their interactions with psychological and social factors.
Psychopathology

Elucidates the complex interrelationships of biology, subjective experience, behavior and therapies

Psychopathology is a record of research centered on findings, concepts, and diagnostic categories of phenomenological, experimental and clinical psychopathology. Studies published are designed to improve and deepen the knowledge and understanding of the pathogenesis and nature of psychopathological symptoms and psychological dysfunctions. Furthermore, the validity of concepts applied in the neurosciences of mental functions are evaluated in order to closely bring together mind and brain. Major topics of the journal are trajectories between biological processes and psychological dysfunction that can help us better understand a subject's inner experiences and interpersonal behavior. Phenomenological and experimental psychopathology, neuropsychology and neuroscience, as well as developmental psychopathology and youth mental health contribute to this field.

A unique journal with a top SCI ranking of 13.744

As the volume of literature in the fields of psychotherapy and psychosomatics continues to grow, it becomes increasingly difficult to keep abreast of new and important developments, and to have independent, critical views on key clinical issues concerned with assessment and treatment of mental disorders. Psychotherapy and Psychosomatics has progressively increased its reputation for independence, originality and methodological rigor. It has anticipated and developed new lines of research concerned with psychosomatic medicine, psychotherapy research and psychopharmacology. The journal features editorials and reviews on current and controversial issues; innovations in assessment and treatment; original investigations; literature updates; and a lively correspondence section. It has become a unique and vital reference to current research and practice, the home of innovative thinking at the interface between medical and behavioral sciences.

The importance of psychosomatic research has been greatly reinforced by evidence demonstrating that psychological phenomena may have distinct effects on human health. Recognizing the complexity of interactions between personality and physical illness, this series employs an interdisciplinary strategy to explore areas where knowledge from psychosomatic medicine may aid in the prevention of specific diseases or help meet the emotional demands of hospitalized patients. In each work, the editor has managed to bring together distinguished contributors, creating a series of coherent and comprehensive reviews on a variety of novel topics.
Modern Trends in Psychiatry

Focussing on the effects of drug treatment on psychiatric and neurological disorders, this series is concerned with the mechanisms of action of psychotropic drugs, their adverse effects as well as the science and experience behind the development of new compounds. On the basis of our growing understanding of the interaction between physical ill health and psychiatric illness, Modern Trends in Psychiatry also investigates the biological and psychological factors that may impact on a patient’s response to psychotropic treatment. Written by international experts who have contributed to the advances in the field of pharmacopsychiatry, this series provides cutting edge research and clinical information, including the latest developments, methods and limitations of current clinical trials. Incorporating Advances in Biological Psychiatry and Key Issues in Mental Health.

Digital Biomarkers

Bridging computer science and biomedicine

Digital biomarkers are defined as objective, quantifiable physiological and behavioral data that are collected and measured by means of digital devices such as portables, wearables, implantables or digestibles. The data collected is typically used to explain, influence and/or predict health-related outcomes. Digital biomarkers also represent an opportunity to capture clinically meaningful, objective data. Multidisciplinary by design, this innovative open access journal bridges the disciplines of computer science, engineering, biomedicine, regulatory science and informatics. The editorial board includes leaders from academia, life sciences, technology and government, thus reflecting the broad scope of the journal. Papers are published within 60 days of submission and the inclusion of videos or other visual materials is supported. Moreover, Digital Biomarkers provides and supports access to data, algorithms and apprepositories linked to the articles published in the journal.
Your source for information on public health and related disciplines

This journal publishes scientific content in the field of public health in general as well as related disciplines, with the aim to promote the discussion and development of knowledge at a national and international level. One special topic issue per year concentrates on a topic of general health interest such as primary care, health economics, new models in health management, or occupational health. The journal publishes original articles, reviews, editorials and opinion articles.
Public Health Genomics

Official Journal of the

From genome-based sciences to global public health

Public Health Genomics is the leading international journal focusing on the timely translation of genome-based knowledge and technologies into public health, health policies, and healthcare as a whole. This peer-reviewed journal is a bimonthly forum featuring original papers, reviews, short communications, and policy statements. It is supplemented by topic-specific issues providing a comprehensive, holistic and “all-inclusive” picture of the chosen subject. Multidisciplinary in scope, it combines theoretical and empirical work from a range of disciplines, notably public health, molecular and medical sciences, the humanities and social sciences. In so doing, it also takes into account rapid scientific advances from fields such as systems biology, microbiomics, epigenomics or information and communication technologies as well as the high potential of “big data” for public health.

What was until very recently no more than a vision for a new era of public health, in which advances in the “-omic” sciences would be integrated into strategies aiming at benefiting population health, has now become a response to the very pressing need for the development of effective personalized healthcare which is complementary to health protection and health promotion. The aim of Public Health Genomics is to facilitate a broad dialogue between academia, the private sector and government bodies.

Medicine and Sport Science

This series was inaugurated at a time when the sport sciences were separated from medicine. From the first volume on, the editors have united these two areas in order to bridge the gap between medicine and sport sciences and to give the scientific community at large, and biomedical researchers in particular, the full benefit of current advances being made in the multifaceted domains of sports medicine. Contributions from biomechanics, biochemistry, physiology, kinesiology, engineering, and from different areas of clinical medicine are incorporated into this innovative series.

Be at the forefront of the latest developments in experimental surgery

European Surgical Research features original clinical and experimental papers, condensed reviews of new knowledge relevant to surgical research, and short technical notes serving the information needs of investigators in various fields of operative medicine. Coverage includes surgery, surgical pathophysiology, drug usage, and new surgical techniques. Special consideration is given to information on the use of animal models, physiological and biological methods as well as biophysical measuring and recording systems. The journal is of particular value for workers interested in pathophysiology concepts, new techniques and in how these can be introduced into clinical work or applied when critical decisions are made concerning the use of new procedures or drugs.

International journal for basic research, clinical trials and practice in complementary medicine

Complementary Medicine Research is an international journal that aims to bridge the gap between conventional medicine and complementary/alternative medicine (CAM) on a sound scientific basis, promoting their mutual integration. Accordingly, experts of both conventional medicine and CAM medicine cooperate on the journal’s editorial board, which accepts papers only after a rigorous peer-review process in order to maintain a high standard of scientific quality.
Current Urology

An international journal for new findings in urology!

Current Urology is an international peer-reviewed journal providing practical, timely, and state-of-the-art contributions on clinical research and experience in urology. The journal encompasses all aspects of basic urological research, surgical and medical oncology, radiology, pathology, urolithiasis, andrology, reconstruction surgery, pediatric urology, female urology and urodynamics, erectile dysfunction, infertility, urinary infections and inflammations, endourology, and transplantation. Each issue contains reviews, original articles, surgical techniques, case reports, book reviews and correspondence. It is published online and in print. Urologists, oncologists, pathologists, radiologists and scientists are invited to hand in their contributions to make Current Urology a viable international forum on latest findings in research and practice in urology.

Folia Primatologica

International Journal of Primatology
Internationale Zeitschrift für Primatologie
Journal international de Primatologie

Recognising that research in human biology must be founded on a comparative knowledge of our closest relatives, this journal is the natural scientist's ideal means of access to the best of current primate research. Folia Primatologica covers diverse fields, from molecular biology to social behaviour, and features articles on, amongst others, ecology, conservation, palaeontology, systematics and functional anatomy. In-depth articles and invited reviews are contributed by the world's leading primatologists. In addition, special issues provide peer-reviewed publication of conference proceedings and other selected topics. Folia Primatologica is one of the top-rated primatology publications and is acknowledged worldwide as a core journal for primatologists, zoologists and anthropologists.

Microbial Physiology*

*Title change – Formerly: Journal of Molecular Microbiology and Biotechnology

Reflecting the integration of basic and applied microbiology

We are entering a new and exciting era of microbiological study and application. Recent advances in the now established disciplines of genomics, proteomics and bioinformatics, together with extensive cooperation between academic and industrial concerns have brought about an integration of basic and applied microbiology as never before. Microbial Physiology aims to reflect this development by publishing original research papers from all areas of microbiology and biotechnology. It also features written symposia on selected topics, timely reviews and minireviews. Theoretical approaches and descriptions of novel, microbiologically relevant software is also considered. Contributions and ideas from large segments of the scientific community are welcome to make Microbial Physiology a viable, much-needed and up-and-coming forum for current basic and applied microbiological research.
ORL

Journal for Oto-Rhino-Laryngology, Head and Neck Surgery

FACTS & FIGURES

Editor-in-Chief: B.W. O’Malley Jr.
(Philadelphia, PA)

More information:
www.karger.com/ORL

The wORLd of research and practice

ORL contains concise, original scientific papers of interest for both clinicians and researchers in oto-rhino-laryngology and head and neck surgery. Contributions drawn from the basic sciences cover new knowledge on the anatomy, pathology, pathophysiology, immunology and tumor biology of head and neck and the auditory and vestibular system, the salivary glands, paranasal sinuses and of the organs of the upper respiratory and digestive tract. The practical value of the journal is accentuated by reports of clinical progress in diagnosis and therapy.

High Impact Reports in ORL:
These papers focus on novel and exciting translational and clinical research. They have an expedited review process of two weeks and are published within two months of acceptance. High impact reports are limited to four printed pages and should be submitted explicitly for this section.
Urologia Internationalis

Official Scientific Journal Deutsche Gesellschaft für Urologie (DGU)

FACTS & FIGURES

An independent international forum for clinically oriented research

Concise but fully substantiated international reports of clinically oriented research into the science and current management of urogenital disorders form the nucleus of original as well as basic research papers. These are supplemented by up-to-date reviews by international experts on the state-of-the-art of key topics of clinical urological practice. Essential topics receiving regular coverage include the introduction of new techniques and instrumentation as well as the evaluation of new functional tests and diagnostic methods. Special attention is given to advances in new surgical techniques and clinical oncology. The regular publication of selected case reports represents the great variation in urological disease and illustrates treatment solutions in singular cases.

Karger Journals and Book Series 2020
Material for each volume in this series has been skillfully selected to document the most active areas of otorhinolaryngology and related specialties, such as neurotology and oncology. The series reproduces results from basic research and clinical studies pertaining to the pathophysiology, diagnosis, clinical symptoms, course, prognosis and therapy of a variety of ear, nose and throat disorders. The numerous papers correlating basic research findings and clinical applications are of immense value to all specialists engaged in the ongoing efforts to improve management of these disorders. Acting as a voice for its field, the series has also been instrumental in developing subspecialties into established specialties.
Translational Research in Biomedicine

Translational Research in Biomedicine is a book series dedicated to the spread of seminal information in contemporary biomedicine with a translational orientation. It takes a holistic view on translational research that transcends the boundaries between bench and bedside research. Each volume, edited by experts in the field, is a synthesis of ideas, technologies and research outcomes that are associated with a particular theme in contemporary biomedicine. All volumes will be presented in a fashion that is amenable to non-experts, be they scientists or clinical practitioners.

Vol. 7: Leptospirosis and the Kidney
Editors: Yang, C.-W. (Taoyuan); Pan, M.-J. (Taichung); Yang, H.-Y. (Taoyuan)
approx. VIII + 130 p., 11 fig., 11 in color, 5 tab., 2019

Vol. 6: Shockwave Medicine
Editors: Wang, C.-J. (Kaohsiung); Schaden, W. (Vienna); Ko, J.-K. (Kaohsiung)
X + 162 p., 17 fig., 11 in color, 9 tab., 2018

Vol. 5: From Autoto Allotransplantation
Editors: Wei, F.-C. (Taipei); Cheng, H.-Y.; Lin, C.-H. (Taoyuan)
X + 178 p., 46 fig., 43 in color, 3 tab., 2016

Vol. 4: Mistletoe From Mythology to Evidence-Based Medicine
Editors: Zänker, K.S. (Witten); Kaveri, S.V. (Paris/Mumbai)
VIII + 84 p., 5 fig., 5 in color, 5 tab., 2015

Karger eJournal Collections

Basic and clinical research topics across the entire medical spectrum

**Karger eJournal Collection 2020**
Backed by a 129-year tradition of medical publishing, the Karger journal program comprises 76 subscription journals to date, covering all disciplines of human medicine in clinical and research areas.
- Access to all online Karger journals – special arrangements for consortia
- Customized collections according to the needs of your library
- Mixed collections of eJournals and eBooks upon request

Please contact us for a customized offer!
www.karger.com/collections/eJournal

**Karger eJournal Backfile Collection**
69 eJournals from 1998 to 2017 covering substantial progress in disciplines of human medicine in clinical and research areas over the past decades.
- Purchase the complete Karger eJournal Backfile Collection at CHF 25,000 / EUR 22,600 / USD 26,600
- Benefit from attractive flat rates for backfiles of individual titles

Customize your Backfile Collection.
Please ask us for a quote!
www.karger.com/collections/eJournalBackfile

**YOUR BENEFITS:**
- DRM-free content
- COUNTER-compliant statistics
- KBART records for eJournals
- Free online trials available!
- Guaranteed access for five years (perpetual access available)
- Easy access via IP address or user ID and password
- Unlimited simultaneous access

More information:
www.karger.com/collections/eJournal

Karger eJournal Archive Collection
All digitized Karger journal issues from 1997 back to each title’s first year of publication. The collection consists of 76 titles with a total of 2,423 publication years.
- Purchase the complete Karger eJournal Archive Collection at CHF 62,000 / EUR 55,000 / USD 69,000
- Customize to suit your needs at attractive flat rates

Technical specifications:
- Searchable PDF (OCR) format
- 300 dpi
- Full-text search
- XML headers and references

Please contact us for prices and title information.

All prices excl. VAT and local sales tax. EUR prices for eurozone countries, USD prices for USA and Latin America only. Contact us at collection@karger.com for a customized quote according to your specific needs!
eBook Archive Collections

The complete Karger eBook Archive Collection with books from 1996 back to 1890 comprises three individual collections, which can be purchased singly or in combination, and encompasses over 2,400 titles, including nearly 700 out-of-print titles, as well as numerous books not previously available in electronic format.

Complete your existing holdings and provide patrons with access to all Karger medical classics, past and present, with the Karger eBook Archive Collection.

**Karger eBook Archive Collection (Series)**
The Karger eBook Archive Collection includes long-standing book series like Key Issues in Mental Health (166 titles since 1917, of which around 100 titles are out of print now), Chemical Immunology and Allergy (since 1939), Current Problems in Dermatology (since 1959), or Progress in Respiratory Research (since 1963).

*Series Collection*: 1,279 titles  
*Collection Price*: CHF 25,000 / EUR 23,500 / USD 25,500

**Karger eBook Archive Collection (Non-Series)**
Important non-series titles in the eBook Archive Collection are, for example, the proceedings of the First International Congress on Allergy (1952) or Walter Pagel's Paracelsus (1982), a reference title still very much in demand. More than 100 titles are no longer available as print books.

*Non-Series Collection*: 549 titles  
*Collection Price*: CHF 12,000 / EUR 11,400 / USD 12,400

**Karger eBook Archive Collection (German)**
The Karger eBook Archive Collection includes 626 titles in German, going back to the first Karger book published in 1890, the Geburtshülfliches Vademecum. Around 240 titles of this collection are no longer available in print.

*Non-Series Collection German*: 626 titles  
*Collection Price*: CHF 10,000 / EUR 9,500 / USD 10,500

**YOUR BENEFITS:**
- DRM-free content
- Guaranteed access for five years; perpetual access available
- Easy access via IP address or User ID and password
- Unlimited simultaneous access
- COUNTER-compliant statistics on request
- MARC 21 and KBART records available

More information:  
www.karger.com/collections-overview

All prices excl. VAT and local sales tax. EUR prices for eurozone countries, USD prices for USA and Latin America only. Contact us at collection@karger.com for a customized quote according to your specific needs!

**Karger eBook Archive Collection Sets**
All volumes published before 1997 are part of the eBook Archives. Complete your eBooks holdings with the Karger eBook Archive Collection.

*Collection Set (all 3 Collections)*: 2,454 titles  
*Collection Set Price*: CHF 36,000 / EUR 34,000 / USD 37,000

Benefit from a further 20% discount off the combined single collection prices

*Collection Set (Series & Non-Series English)*: 1,828 titles  
*Collection Set Price*: CHF 29,000 / EUR 27,500 / USD 29,500

*To ensure both Series and Non-Series Archive Collections are complete some complementary foreign language titles are included. Please find a detailed list of titles of the “Karger eBook Archive Collection” in the section eBook Collections Information Download.*
Karger Subject Packages

Karger offers packages focusing on a single research or medical subject. The Karger Subject Packages – comprising eJournals and eBooks – provide highly selected content to meet the increasing demand for specific information of researchers, specialists, and practitioners in hospitals, research centers, the pharmaceutical industry, and other professional institutions.

For more details, see www.karger.com/packages-overview and for your enquiries please contact us at collection@karger.com.

Karger Topic Article Packages

The Karger Topic Article Package is a keyword- and subject-based customer-oriented product that contains preselected journal articles and book chapters from across the entire range of Karger’s publishing program, covering individual fields of interest. The semantic search-based selection of articles and book chapters includes only highly relevant search results and guarantees a maximum level of customization and individuality for our customers and their needs.

More details: www.karger.com/tap
Customized quote: tap@karger.com

Karger Fast Facts Collection

The Fast Facts medical handbook series comprises concise guides for busy healthcare professionals and practical workbooks for patients. Designed to advance knowledge in health, these refreshingly readable resources are packed with relevant information on specific diseases, their diagnoses and management. Perfect primers to get up to speed – fast.

More details and pricing: www.karger.com/collections/fastfacts
Contact: collection@karger.com
**Order Information**

**BOOKS**

Book orders can be placed at any bookstore, directly with Karger Publishers or with one of our representatives. Please indicate the ISBN number of any title you wish to order. The e-ISBN refers to the electronic version of a title. Deliveries are made from Karger headquarters in Basel, Switzerland. All Karger book titles, with a few exceptions, are available in print and online (eBooks); for availability and prices, please see the title’s homepage at www.karger.com or contact us at orders@karger.com.

**eBooks**

When ordering a book with an online component, the customer is required to complete a site license (see www.karger.com/form/license). For repeat online customers, there is an appropriate field in the order form. Booksellers should submit a site license completed by the end user, together with the order. Private customers can also order Karger eBooks via Google and Amazon.

**Continuation Orders for Book Series**

Continuation orders can be placed for print and online formats. Such orders bring the benefit of automatic continuity under the order number. Orders can be cancelled at any time.

**Collections:*** For an overview of all Karger collections please see www.karger.com/collections-overview.

**eJournal Collections:**

Karger eJournal Collection:
www.karger.com/collections/eJournal

Karger eJournal Backfile Collection:
www.karger.com/collections/eJournalBackfile

Karger eJournal Archive Collection:
(issues up to 1997):
www.karger.com/collections/eJournalArchive

**eBook Collections:**

Karger eBook Collection:
www.karger.com/collections/eBook

Karger eBook Archive Collection:
www.karger.com/collections/eBookArchive

Karger Fast Facts Collection:
www.karger.com/collections/fastfacts

**JOURNALS**

Journal subscriptions can be placed at any bookstore, subscription agency, directly with Karger Publishers, or with one of our representatives.

**Subscriptions**

Karger offers three types of subscription: print, online and combined print/online. The basic annual subscription rate is the same for all three delivery forms; however, there are additional fees for print and combined print/online.

**Subscription Rate Model**

<table>
<thead>
<tr>
<th>Delivery Form</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Print</td>
<td>100% + postage and handling</td>
</tr>
<tr>
<td>Online</td>
<td>100%</td>
</tr>
<tr>
<td>Com. print/online</td>
<td>100% + upgrade fee + postage and handling</td>
</tr>
</tbody>
</table>

The complete order information can be found on our website at www.karger.com/services/bookorders.

**Subject Packages:** For details about the six currently available subject packages please see www.karger.com/packages-overview.

**Topic Article Packages:** For details about the seven currently available topic article packages please see www.karger.com/tap.
For personal subscription prices, please consult our website at www.karger.com/journals. For online and combined print/online subscriptions, please also consult www.karger.com/sitelices. All subscriptions are payable in advance.

**Subscription Period**
Print subscriptions run for a full calendar year and may cover more than one volume. New subscriptions placed during the year will begin with the delivery of back issues for that subscription year. An online subscription allows access only to issues published in the subscription year.

For questions and problems contact us at service@karger.com.

**Authorized Access**
Access is regulated via IP address(es) and/or user ID/password. Karger supports both Shibboleth and OpenAthens.

**Back Volumes and Single Issues**
Information on availability and prices of single print issues, print back volumes or electronic backfiles can be obtained at service@karger.com.

Contact details of the Karger offices and distributors can be found at www.karger.com/contact.

Every book and journal homepage offers an online order form. Orders can also be e-mailed to orders@karger.com.

Please note that due to bank regulations Karger Publishers accepts checks only for payments above the amount of CHF/EUR/USD 5,000. If you have any questions, please do not hesitate to contact our Customer Service at orders@karger.com.

**Information Service**
The Karger Alert system informs you about all new article, journal or book releases in your field of interest. Login on www.karger.com, set up your MyKarger account, and sign up for customized alerts and newsletters.

For complete order information, please refer to our website at www.karger.com/orderinformation.

**Prices, Ordering and Contact**
Unless otherwise stated, the online price applies to institutional purchases; the online price for private customers is the same as the hard cover or soft cover (print) price. All prices are based on the Swiss Franc (CHF) and subject to change. Prices in EUR are valid for eurozone countries only; prices in USD are valid for the USA and Latin America only. Prices quoted do not include delivery charges and are excluding VAT and local sales tax. Where applicable, VAT is applied at the appropriate rate and shown separately in the final invoice.

BIG DATA PROBLEM

40 million and counting. That’s how many online authoritative biomedical documents you’ll need to sift through to find the specific information you need. Traditional search engines just aren’t up to the task, wasting your time, money and patience.

BIG DATA SOLUTION

Only Artificial Intelligence (AI) coupled with Visual Analytics can address the problem effectively. Introducing Qinsight powered by BioAI™, the first and only results engine delivering:

- Deeper, more relevant discovery
- Analysis of informative text
- Methodology specific to the biomedical field
- Visual analytics to predict trends, uncover hidden connections and recognize additional concepts

Seeing IS believing

No one else discovers, analyzes, and delivers insights from literature the way Quertle does

For more information and to order contact Quertle partner:
Karger Publishers via quertle@karger.com
