The interdisciplinary ‘hub’ for researchers, clinicians and public health professionals

Biomedicine Hub

www.biomedicinehub.com

- open access
- peer-reviewed
- fast online publication

An international Editorial Board with more than 170 renowned specialists guarantees high-quality and relevant content.

There is currently no Article Processing Charge (APC).

Biomedicine Hub is an interdisciplinary journal: a ‘hub’ for researchers, clinicians and public health professionals across biomedical disciplines to share research findings, ideas, theories, experimental results and clinical experience.

Biomedicine Hub aims at facilitating the exchange of knowledge between disciplines, with a focus on translational science for the development of cutting-edge technologies and the improvement of health care. A further focus is on emerging interdisciplinary fields at the forefront of medicine.

Biomedicine Hub

Biomedicine Hub
This peer-reviewed online-only journal publishes original case reports covering the entire spectrum of dermatology, including prevention, diagnosis, treatment, toxicities of therapy, supportive care, quality-of-life, and survivorship issues. The journal will also accept case reports dealing with the use of novel technologies, both in the arena of diagnosis and treatment. Supplementary material is welcomed.

The intent of the journal is to provide clinicians and researchers with a tool to disseminate their personal experiences to a wider public as well as to review interesting cases encountered by colleagues all over the world. Universally used terms can be searched across the entire growing collection of case reports, further facilitating the retrieval of specific information.

Following the open access principle, the entire contents can be retrieved at no charge, guaranteeing easy access to this valuable source of anecdotal information at all times.

This peer-reviewed online-only journal publishes original case reports covering the entire spectrum of gastroenterology. Clinicians and researchers are given a tool to disseminate their personal experience to a wider public as well as to review interesting cases encountered by colleagues all over the world. To complement the contributions supplementary material is welcomed.

The reports are organized according to the classification used by the American Gastroenterological Association Institute; it will be possible to search across the entire growing collection of case reports with universally used terms, further facilitating the retrieval of specific information. Following the open access principle, the entire contents can be retrieved at no charge, guaranteeing easy access to this valuable source of anecdotal information at all times.

Cellular Physiology and Biochemistry

A multidisciplinary scientific forum on cellular function

www.karger.com/cpb

- peer-reviewed
- fast online publication
- no limitation on article length

Cellular Physiology and Biochemistry is a multidisciplinary scientific forum dedicated to advancing the frontiers of basic cellular research. It addresses scientists from both the physiological and biochemical disciplines as well as related fields such as genetics, molecular biology, pathophysiology, pathobiochemistry and cellular toxicology & pharmacology. Original papers and reviews on the mechanisms of intracellular transmission, cellular metabolism, cell growth, differentiation and death, ion channels and carriers, and the maintenance, regulation and disturbances of cell volume are presented. Appearing monthly under peer review, Cellular Physiology and Biochemistry takes an active role in the concerted international effort to unravel the mechanisms of cellular function.

An open-access subjournal to Cerebrovascular Diseases

Cerebrovascular Diseases Extra

www.karger.com/cee

- open access
- peer-reviewed
- fast online publication

This open access and online-only journal publishes original articles covering the entire spectrum of stroke and cerebrovascular research, drawing from a variety of specialties such as neurology, internal medicine, surgery, radiology, epidemiology, cardiology, hematology, psychology and rehabilitation. Offering an international forum, it meets the growing need for sophisticated, up-to-date scientific information on clinical data, diagnostic testing, and therapeutic issues. The journal publishes original contributions, reviews of selected topics as well as clinical investigative studies. All aspects related to clinical advances are considered, while purely experimental work appears only if directly relevant to clinical issues.

Cerebrovascular Diseases Extra provides additional contents based on reviewed and accepted submissions to the main journal Cerebrovascular Diseases.

Current Urology is an international peer-reviewed journal providing practical, timely, and state-of-the-art contributions on clinical research and experience in urology.

The journal encompasses all aspects of basic urological research, surgical and medical oncology, radiology, pathology, urolithiasis, andrology, reconstruction surgery, pediatric urology, female urology and urodynamics, erectile dysfunction, infertility, urinary infections and inflammations, endourology, and transplantation. Each issue contains reviews, original articles, surgical techniques, case reports, book reviews and correspondence. It is published online and in print.

Urologists, oncologists, pathologists, radiologists and scientists are invited to hand in their contributions to make Current Urology a viable international forum on latest findings in research and practice in urology.

This open access and online-only journal publishes original articles covering the entire spectrum of cognitive dysfunction such as Alzheimer’s and Parkinson’s disease, Huntington’s chorea and other neurodegenerative diseases. The journal draws from diverse related research disciplines such as psychogeriatrics, neuropsychology, clinical neurology, morphology, physiology, genetic molecular biology, pathology, biochemistry, immunology, pharmacology and pharmaceutics. Strong emphasis is placed on the publication of research findings from animal studies which are complemented by clinical and therapeutic experience to give an overall appreciation of the field. *Dementia and Geriatric Cognitive Disorders Extra* provides additional contents based on reviewed and accepted submissions to the main journal *Dementia and Geriatric Cognitive Disorders*. Dermatopathology

Provides recent clinicopathological information for dermatopathologists

www.karger.com/dpa

- peer-reviewed
- fast online publication
- no limitation on article length

Dermatopathology is a peer-reviewed online-only journal publishing original scientific articles dealing with diagnostic and experimental human and animal studies in dermatopathology. Contributions to clinicopathological correlations, studies based on current molecular technologies as well as controversial issues and case reports are welcome. The aim of the journal is to share interesting and most recent clinicopathological information with the community of dermatopathologists all over the world and to create a stronger link between dermatopathology, clinical dermatology and investigative dermatology. Dermatopathology also provides a resource for continuing medical education in cutaneous pathology. After acceptance, articles are published online very quickly, ensuring the rapid availability of scientific knowledge for all clinicians and researchers interested in this specialty. According to the open-access principle, the contents of the journal can be retrieved at all times without any charge.

Integrative Medicine International is a peer-reviewed open access journal that serves as an instant media platform for those wishing to publish research reports and any other relevant content dealing with diagnosis, evaluation and therapy. The journal focuses on the latest trends and developments, experiences and achievements in all areas of integrative medicine, complementary and alternative medicine (CAM), as well as advances in the attempt to modernize traditional medicine. This includes traditional herbal medicine, acupuncture, tai chi, chiropractic, massage, mind-body therapy (music therapy), yoga therapy, Ayurveda, creative therapy, nutrition counseling and exercise programs.

Manuscripts can be submitted in the form of original articles, review articles, herb-drug interaction reports, clinical trials and clinical experiences. The objective of the journal is to publish new methods in research and therapy to complement and extend the methods of western medicine. Due to its integrative and cross-disciplinary approach, the journal should be of interest to readers worldwide.

This journal comprises both clinical and basic studies at the interface of nephrology, hypertension and cardiovascular research. The topics to be covered include the structural organization and biochemistry of the normal and diseased kidney, the molecular biology of transporters, the physiology and pathophysiology of glomerular filtration and tubular transport, endothelial and vascular smooth muscle cell function and blood pressure control, as well as water, electrolyte and mineral metabolism. Also discussed are the (patho)physiology and (patho)biochemistry of renal hormones, the molecular biology, genetics and clinical course of renal disease and hypertension, the renal elimination, action and clinical use of drugs, as well as dialysis and transplantation. Featuring peer-reviewed original papers, editorials translating basic science into patient-oriented research and disease, in depth reviews, and regular special topic sections, Kidney & Blood Pressure Research is an important source of information for researchers in nephrology and cardiovascular medicine.

Aims and Scope

Medical Principles and Practice, as the journal of the Health Sciences Centre, Kuwait University, aims to be a publication of international repute that will be a medium for dissemination and exchange of scientific knowledge in the health sciences.

Selected contributions

• Most Important Chronic Complications of Arteriovenous Fistulas for Hemodialysis: Stolic, R. (Kosovska Mitrovica, Serbia)
• Sonographic Assessment of Renal Size in Healthy Adults: El-Reshaid, W. (Safat, Kuwait); Abdul-Fattah, H. (Kuwait City, Kuwait)
• Amyloid-Beta: A Crucial Factor in Alzheimer’s Disease: Sadigh-Eteghad, S.; Sabermanouf, B.; Majdi, A.; Talebi, M.; Farhoudi, M.; Mahmoudi, J. (Tabriz, Iran)
• Primary Health Care and Public Health: Foundations of Universal Health Systems: White, F. (Victoria, B.C., Canada/Halifax, N.S., Canada)
• Tumor Markers in Clinical Practice: A Review Focusing on Common Solid Cancers: Duffy, M.J. (Dublin, Ireland)
• Interactions between Herbs and Conventional Drugs: Overview of the Clinical Data: Izzo, A.A. (Naples, Italy)
• A Simplified and Structured Teaching Tool for the Evaluation and Management of Pulseless Electrical Activity: Littmann, L.; Bustin, D.J.; Haley, M.W. (Charlotte, N.C., USA)

Neurosignals is an international journal dedicated to publishing original articles, reviews and short reports in the field of neuronal communication. Novel findings related to signaling machinery, pathways and networks that are associated with development and functioning of the nervous system are most welcome. Reported observations should significantly contribute to the advancement of our understanding of neuronal signaling and be presented in a format applicable to an interdisciplinary readership. Manuscripts addressing the journal’s topics of discussion from a bioinformatics perspective will also be considered for publication.

Obesity Facts publishes articles covering all aspects of obesity, in particular epidemiology, etiology and pathogenesis, treatment, and the prevention of adiposity. As obesity is related to many disease processes, the journal is also dedicated to all topics pertaining to comorbidity and covers psychological and sociocultural aspects as well as influences of nutrition and exercise on body weight. The editors carefully select papers to present only the most recent findings in clinical practice and research. All professionals concerned with obesity issues will find this journal a most valuable update to keep them abreast of the latest scientific developments.

Special sections comprising a variety of subspecialties reinforce the journal’s value as an exhaustive record of recent progress for all internists, gastroenterologists, endocrinologists, pediatricians, dieticians, nutritionists, bariatric surgeons, psychologists and psychiatrists, occupational health practitioners, sports medicine specialists, ecotrophologists, sociologists, and biologists as well as prevention and public health researchers. In addition, Obesity Facts serves as an ideal information tool for the members of the pharmaceutical and food industry as well as those active in nutritional research and medicine.
