**Presence of Properdin in a Fraction I Preparation**

R. CONTE MAROTTA, E. ROMANO, I. DI TOMMANO AND S. JORIO  
Naples, Italy

*Abstract*

The properdin and antihemophilic activities have been determined for a Fraction I preparation obtained by slightly changing the precipitation conditions described by *Cohn* in his method 6. In particular, the pH was carefully kept at 6.8-6.9.
