

A Tribute to the Editorial Board 2016

Last year marked the 25th anniversary of *Cerebrovascular Diseases*.

This special tribute is dedicated to the members of our Editorial Board, to whom we owe the success of the Journal. It has been a real pleasure to work with you over the years, and we extend our deepest gratitude for your hard work and commitment.

Under the leadership of the Editor-in-Chief, our expert panel of Associate Editors carefully considers each article to ensure that only the best manuscripts are reviewed and accepted. Every published article is the result of patient scrutiny and constructive criticism, with the goal of improving the quality of the manuscript. From the Americas to Australia, from Europe to Asia, our Editors hail from the world's leading neurological institutes. The diversity of our Editorial Board not only upholds rigorous global scientific standards, but also broadens the Journal's critical and scientific horizons. Each Editor brings unique insights and experiences into the publication process, and together with the contributing authors, the work of our Editorial Board enables the Journal to showcase new findings and unexpected insights from the rapidly evolving field of cerebrovascular diseases.

It is with great pleasure that we introduce each Editorial Board member to all our readers of *Cerebrovascular Diseases*.
