
1st Congress of the International Dermoscopy Society

Naples, April 27–29, 2006

The recently founded International Dermoscopy Society organizes a meeting designed for all colleagues interested in the diagnosis and management of pigmented skin lesions. Special emphasis will be put on guidelines for management, standardization of reports and, particularly, on the development of machine vision in dermoscopy. In addition, seminars in discussion format and half-day workshops with special emphasis on pertinent issues in dermoscopy will be carried out.

The detailed programme is presented on the website:
<http://www.dermoscopy-ids.org>

1st World Congress on Teledermatology

Graz, November 9–11, 2006

International Society of Teledermatology and
Department of Dermatology, Medical University, Graz

Teledermatology holds great potential for revolutionizing the delivery of dermatologic services with benefits to physicians and patients alike.

The 1st World Congress on Teledermatology will bring together all colleagues interested in teledermatology to discuss recent technologies, clinical studies, patients' and investigators' viewpoints, cost-effectiveness, security and legal aspects as well as teleteaching. Updated information concerning the congress will be presented on the conference website (<http://www.teledermatology-society.org/worldcongress>).
